# LETTER OF SUBMITTAL

---

THE COMMONWEALTH OF MASSACHUSETTS,  
OFFICE OF THE SECRETARY,  
DIVISION OF VITAL STATISTICS.

Boston, March 29, 1951

*To the Honorable Senate and House of Representatives:*

I have the honor to submit herewith, as required by Chapter 46, section 21, and Chapter 208, Section 47, of the General Laws, the one hundredth and ninth annual report on statistics of births, marriages, divorces and deaths in Massachusetts, for the calendar year 1950. Deaths are reported monthly while births, marriages, and statistics of divorce are not required to be reported until March, April and May of the year following that in which the events occur.

The editorial review and the method of presentation of the statistical data were prepared by Arthur J. Hassett, State Registrar, in charge of the Division of Vital Statistics. The statistical tables were prepared under the direction of Elizabeth M. Canty, statistician of the division. The exhibition of tabular results is restricted to such as are plainly of practical utility within the meaning of the statute by authority of which the tables are prepared.

Respectfully submitted,

EDWARD J. CRONIN,  
*Secretary of the Commonwealth*

## INTRODUCTION

### *History.*

**Death Registration.** — Massachusetts was one of the first colonies to recognize the importance of the registration of vital statistics, and as early as 1639 required registration of births, marriages and deaths; in 1842 statutes required copies to be filed with the Secretary of the Commonwealth. In 1880 the registration area for deaths recognized by the United States Bureau of the Census, i.e., the States, and cities in other States, effectively enforcing satisfactory registration laws of all deaths registered, included but two States, Massachusetts and New Jersey, the District of Columbia, and a number of cities in non-registration States.

During the period 1841 to 1950 inclusive, 4,374,129 copies of deaths have been received, filed, and tabulated in the Division of Vital Statistics. The original records are on file in the cities, towns and States in which the events occurred and copies in the city and town given as the residence of the deceased at the time of death. Chapter 439, Acts of 1945, provides that in cases of burial of war veterans in a city or town other than the place of death or residence, a copy of the death certificate shall also be filed with the Clerk of the place of burial.

**Purpose.** — Death registration often gives the first intimation of pestilential disease, permitting health officers to attack epidemics in their incipency. It serves as evidence in the inheritance of property and in the settlement of life insurance. It is useful in preventing crime through the restriction placed upon the disposal of dead human bodies, and insures a permanent and uniform record of the death of each individual for all purposes.

**Importance of Death Records.** — Where proof concerning death is needed:

1. To prove the fact of death: For life-insurance claims; for liquidation of estates.
2. To prove facts about the deceased: For tracing ancestry; for names of husband or wife, and parents; for information on circumstances and cause of death; for age, sex, and race; for recording date and place of interment.
3. To prove date of death: For settlement of pensions; for insurance adjustments; for general legal use.

**Mortality Statistics.** — Mortality statistics, or statistics of deaths, are useful in showing the extent and rate of change in population produced by deaths; the average duration of life, the relative frequency with which the several causes produce death, and for their service in creating an interest in public health administration and securing support for sanitary measures. In comparison with birth statistics they give useful information regarding population increase or decrease. Mortality statistics, however, cannot be used as an index of the prevalence of certain diseases, because there is no fixed ratio between sickness and fatality. Only cases of fatal sickness or disease are given, while morbidity statistics include all cases, whether fatal or not.

**Source of Data.** — Mortality statistics are based upon original data obtained by the registration of deaths, which is accomplished by the filing of a standard death certificate with the local Board of Health.

The responsibility for seeing that a certificate is properly made out and filed rests with the undertaker, who is required by law to present a satisfactory certificate of death before he may obtain a permit to remove or bury a body. The local boards of health are required to transmit the death certificates to the city or town clerks who in turn record the deaths and are required to transmit certified copies to the Secretary of the Commonwealth on or before the tenth day of the month following that in which the deaths occurred. Hospitals and other institutions are required to obtain, when persons are received, the facts which are required for record in the event of the deaths of such persons. Chapter 604, Acts of 1949, relates to the burial or other disposition of the bodies of veterans.

**Occupations.** — Great interest is shown in the study of occupations in connection with cause of death due to the fact that many industries have adapted newer types of machines that give employment to large numbers and may have increased occupational risks. Table 19 has been prepared from the list of occupations published by the Bureau of the Census showing the number of those gainfully employed who died from important causes; and, since large numbers of women have entered the industrial field during the last decade, the Table shows sex as well.

**Death Rates and Their Comparability.** — The death rates given in this report are based upon the comparison of total deaths with the aggregate population. They are usually expressed in terms of the number of deaths per 1,000 population, and are calculated by dividing the total number of deaths by the population in thousands. This means that death rates vary with the character of the population and each element has its relation to the rate of mortality, and therefore, for comparison with other States or countries, the make-up of the population must be considered. The death rate per 1,000 males is generally higher than the rate per 1,000 females. Hence, a State having a relatively larger female population than another will normally show a lower death rate and a community where the very young or old predominate will show a higher rate than a community made up largely of young adults. Rates will also vary with the color and nationality of the inhabitants.

Factors which seriously affect the comparability of the death rates of different communities are: (1) race composition; (2) the social, marital, and economic status of the people; (3) employment; (4) migration; and (5) the birth rate.

**Allocation.** — Deaths are charged to the place of event and also are allocated to the place of residence of the deceased. This insures as near a true rate as possible and has a marked effect on municipalities which are large hospital centers. The usual place of residence has been used as a basis for all deaths occurring outside the State as well as for those in the State. Except for purposes of allocation former residents of Massachusetts who have died in other States, after an absence from Massachusetts of more than one year, are considered as non-residents. Residents of other States who have resided in Massachusetts for more than one year are considered as residents. In the case of institutions and jails deaths have been allocated to the place of residence before entrance. Such persons are regarded as temporary residents of these places since they did not voluntarily enter with the intention of remaining and without doubt would have returned, if discharged, to their usual residence. Accidental deaths have been treated in the same manner as those caused by sickness. Also, those deaths due to violence have been allocated to the place of occurrence (see Table 16, page 196). The foregoing outline does not by any means cover all cases that may and will arise but will serve as an explanation of the method used in preparation of allocated tables.

**Number of Deaths and Death Rates.** — There was a decrease in the mortality of 1950 as compared with that of 1949, the number of deaths occurring in the State during the calendar year 1950 being 51,091, a decrease as compared with 1949 of 10. Based on the estimated population of July 1, 1950, of 4,699,859, these deaths correspond to a rate of 10.9 per 1,000 population. The rate for 1949 was 11.0. Deaths of residents of Massachusetts numbered 50,359 in 1950, resulting in a death rate of 10.7 per 1,000 inhabitants,

During the ten-year periods, from 1931 to 1940, inclusive, the average death rate of the Commonwealth was 11.5, and from 1941 to 1950, inclusive, 11.4.

**Sex.** — Of the 51,091 deaths in 1950, 27,300, or 53.4 per cent, were males, the percentage in 1949 being 53.3. The proportion of males in the living population, as shown by the United States Census of 1940, was 48.7 per cent. Expressed as a ratio, there were 1,147 deaths of males per 1,000 deaths of females in 1950, as compared with 1,141 in 1949, 1,139 in 1948 and 1947. Of the 50,359 residents of the State who died in 1950, 26,870, or 53.4 per cent, were males.

Table 3 on page 30, shows that the death rate of males has been consistently greater than the death rate for females. The death rate of the sexes has fluctuated considerably, reaching the maximum in 1918, when the difference was 3 per 1,000.

**Age.** — Of the 50,359 deaths in 1950 of residents of the State, 2,277, or 4.5 per cent were of infants under 1 year of age. The rates for infant deaths in previous years were 4.6 per cent in 1949 and an average of 5.2 per cent for the five years from 1945 to 1949, 5.1 per cent for the five years from 1940 to 1944 and 5.3 per cent for the five years from 1935 to 1939. A more detailed discussion of infant mortality may be found on pages 6 and 7.

**Sex and Age.** — The death rate of adult males might be expected to exceed the rate of adult females, because of the more dangerous occupations of the males, but the excess in the death rate of male infants as compared with female infants has never been satisfactorily explained. Of the 2,277 decedents under 1 year of age in 1950, 1,330, or 58.4 per cent, were males. The ratio of male to female deaths among the higher age periods fluctuated somewhat. The proportion of male deaths was the larger from 1 year of age up to and including the age period 70 to 74 years. From the age of 75 years and upward the number of deaths of females exceeded the deaths of males including the reputed centenarians, numbering 38, of whom 8 were males and 30 were females. The excess of females in the population 65 years of age and over is so great that even though their mortality at each age period is below that of males, the absolute number of deaths is greater. The ratios of male deaths per 1,000 deaths of females at the various age periods in the four years 1947-1950 are shown in Table 6, on page 31.

Among the 26,870 male decedents in 1950, 1,330, or 4.9 per cent, were under 1 year of age; among the 23,489 female decedents, 947, or 4 per cent, were under 1 year of age; and among the decedents of both sexes, 4.5 per cent were under 1 year of age (see Table 7, page 32).

**Marital Condition.** — Not quite one-half (46.9 per cent) of the decedents 15 years of age and over, whose marital condition was reported in 1950 were married, 16 per cent were single, 34.8 per cent were widowed, 2.2 per cent were divorced and .1 per cent were unknown. Among the male decedents 58.3 per cent were married, 15.3 per cent were single, 23.6 per cent were widowed, 2.6 per cent were divorced and .2 per cent were unknown. Among the female decedents 33.9 per cent were married, 16.8 per cent were single, 47.5 per cent were widowed, 1.7 per cent were divorced, and one-tenth of one per cent were unknown. No precise study of the bearing of marital condition on mortality statistics can be made, however, without a detailed statement of the age distribution of the population. The age groups used in the census statistics do not coincide with the age groups used in the tabulation of death statistics, so that the two sets of figures cannot be used together. Table 8, on page 33 shows the number of deaths of males and females 15 years of age and over by marital condition.

**Seasonal Distribution of Deaths.** — The largest number of deaths during any month occurred in March (4,602) and the next largest number in January (4,474) and December (4,471). Since the months are not of equal length, the monthly incidence must be reduced to a uniform basis. The average daily number of deaths for 1950 was 138. The months showing the highest average for the year were March and April, (148), each, and January, February and December (144), each. Table 9, on page 33, shows the number of deaths in each month of 1950, in counties, and in cities having over 50,000 inhabitants in 1950.

### *Infant Mortality.*

Much credit is due to physicians, hospitals, public health officials and mothers for the gratifying results obtained in their campaign against infantile diseases. The present low rate of infant mortality, together with the steadily declining rate over a long period of years, is largely due to the constantly improving methods of infant feeding and the continued developments in community and home sanitation.

The infant mortality for residents of the State in 1950 was 23.8 per 1,000 live births. This rate has been moving steadily downward being largely due to the reduction in deaths from gastro-intestinal, respiratory and communicable diseases. Reference to Table 28 on page 246, shows in striking manner the remarkable reduction in infant mortality, actual decrements without regard for increase in the number of births and without regard for increase in population.

In the ten years from 1941 to 1950, there has been an increase of 35.7 per cent in the number of live births registered. In 1950 deaths of Boston residents under 1 year of age numbered 419 or 25.4 per 1,000 live births. The rates for previous years were 25.5 in 1949, 34.3 in 1948, 36.1 in 1947 and 34.8 in 1946. In the ten years from 1941 to 1950 there has been an increase of 3,476 in the number of live births registered. For the remainder of the State, the number of births registered increased 40.7 per cent during this period. The infant mortality rates for the State, exclusive of Boston, decreased from 52.9 per 1,000 live births in 1931 to 23.5 in 1950, as compared with a decrease in Boston from 60.6 in 1931 to 25.4 in 1950. (See Table 28, on page 246.)

Deaths under four weeks and also under one year of age in each municipality are shown in Table 24, on pages 241 to 243.

The infant mortality rates in municipalities having 15,000 or more inhabitants in 1950 are shown for the years 1943 to 1950 in Table 26, on page 244.

The highest proportion of deaths occurs in the early period of infancy and especially is this true of the first few days. In 1950, 1,587 deaths occurred in the first week, constituting 69.7 per cent of all deaths under 1 year of age. On the first day the percentage of deaths (39.7 per cent) was higher than on any other day. In the first four weeks of life there were 1,750 deaths, or 76.9 per cent of all infant deaths.

In the first three months there were 1,942 deaths, or 85.3 per cent of all infant deaths. Ninety-two and six-tenths per cent of the infant deaths occurred in the first half of the year.

Almost nine-tenths, 89.2 per cent, of the 1,587 babies who died less than one week after birth, died of immaturity, postnatal asphyxia and atelectasis, malformations, or injuries received at birth. Of the 1,708 babies who died from these causes before reaching the age of 1 year, 48.8 per cent died in less than one day, 82.9 per cent died in less than one week, and 89.8 per cent died in less than four weeks.

Diseases of the digestive system, formerly important factors in causing infant deaths, claimed 46, or 2 per cent of the babies who died before reaching 1 year of age. Eighty and four-tenths per cent of these deaths were from diarrhea and enteritis which has shown a remarkable decrease since 1900.

The largest number of deaths of infants is due to developmental and wasting diseases, and the figures indicate a reduction in infant mortality due to these causes, — from 29.0 deaths per 1,000 live births in 1926 to 11.5 in 1950. Respiratory diseases also caused a considerable number of deaths. The number of infant deaths from bronchopneumonia has fluctuated somewhat since 1946 when there were 253 infant deaths from this cause, 220 in 1947, 154 in 1948, 106 in 1949 and 86 in 1950. The principal causes of infant deaths for the years 1943 to 1950 are shown in Table 30, page 246.

### *Causes of Death.*

**Sources of Error in Mortality Statistics.** — The chief element of error in mortality statistics lies in the inaccuracy of the statement of the cause of death as reported by the attending physician, who may not have been in a position to feel reasonably certain as to the nature of the terminal illness. Statements of cause of death are often incomplete as a result of the unintentional failure of the physician to state all the morbid conditions known to him which resulted in the death. Again, the physician sometimes fails to enter on the death certificate a qualifying term, which if given would modify the classification of the cause of death. Beginning with 1949, the 1948 or sixth revision of the Manual of International List of Causes of Death was used in the assignment of causes of death.

It should also be borne in mind that the process of classifying the thousands of different terms — some of them of a very indefinite or unsatisfactory character — under the 900 or more titles of the International List of Causes of Death presents many difficulties which are seldom fully appreciated by those who have not engaged in the work of classification. Even if each certificate of death received during 1950 bore only a single cause, the process would present many difficulties. Many certificates, however, bear statement of two or more causes instead of one and a system of selection, according to the precedents and rules of the Expert Committee of the World Health Organization, has been adopted by the United States Bureau of the Census, and is used in the Division of Vital Statistics. Because of the complications attendant upon any attempt to show all primary and secondary terms in relation, it becomes necessary to base all statistical compilations of causes of death on the selection of the underlying cause of death as stated by the certifying physician, except in instances where the order of entries on the medical certificate is obviously erroneous. The medical certificate, recently adopted, permits the certifying physician or surgeon to signify more clearly the order of events leading up to death. This means that when two or more morbid conditions are given on a certificate one of them must be selected as the cause under which the death must be classified. Special weight has usually been given to communicable diseases when combined with other causes, and assignments are made to external causes when serious enough to be a factor in the cause of death.

**Principal Causes.** — More than two-thirds of the 50,359 resident deaths reported in 1950 were caused by diseases of the heart, cancer, cerebral hemorrhage (including embolism and thrombosis), pneumonia and nephritis. These diseases, together with tuberculosis in all forms, external causes, malformations and the diseases of early infancy caused 85.5 per cent of the deaths for the year. There

were 51,091 registered deaths in 1950, the allocated rate being 10.7 and the registered rate, 10.9. Table 21 on pages 238 and 239 shows the number of residents of the State who died from these causes.

**Heart Disease**, as usual was the leading cause of resident deaths in 1950, the total number being 21,352, corresponding to a rate of 454.3 per 100,000 population as compared with 21,241 deaths, or 455.8 per 100,000 in 1949. Deaths from heart disease, reported as having occurred in Massachusetts numbered 21,596, or 459.5 per 100,000 population.

**Cancer and other Malignant Neoplasms.** — Cancer ranked second in numerical importance among all the causes of death. The resident deaths from cancer were 8,597, the rate being 182.9 per 100,000 population, with cancers of the digestive organs and peritoneum claiming 42.9 per cent of these deaths, cancer of the genito-urinary organs 19 per cent; breast 10.2 per cent; respiratory system 9.5 per cent; hematopoietic and lymphatic tissues 7.1 per cent; buccal cavity and pharynx 2.7 per cent; and 8.6 per cent were of other or unspecified organs. The death rate from cancer has steadily risen from 89.6 in 1910 to 183.1 in 1948, an all-time high, with the first decreases during the last twenty-five years, 171.6, 170.6, 180.9 and 182.9 occurring in 1945, 1946, 1949 and 1950 respectively. It is possible that at least a part of this increase is due to more correct diagnosis and greater care on the part of the physicians in making reports, but a part at least is due to the lengthened span of life, resulting in a larger number of people reaching the older age groups.

Among the male deaths the per cent distribution was as follows: digestive organs and peritoneum 45.5; genito-urinary organs 17.8; breast .2; respiratory organs 15.5; hematopoietic and lymphatic tissues 7.9; buccal cavity and pharynx 4.5 and other or unspecified organs 8.6. The per cent distribution of the female deaths was as follows: digestive organs and peritoneum 40.3; genito-urinary organs 20.2; breast 20.1; respiratory system 3.5; hematopoietic and lymphatic tissues 6.3; buccal cavity and pharynx .9 and other or unspecified organs 8.7.

Of cancer of the digestive organs and peritoneum, cancer of the stomach claimed the largest number of males, 14.6 per cent, while cancer of the intestines claimed 17.2 of the females. Among the deaths from cancer of the genito-urinary organs, 27 per cent were of the prostate gland and 30.1 per cent were of the uterus. More than three-fourths of the deaths from cancer of the lungs and bronchus were of males, 81.5 per cent, while 18.5 per cent were of females. In the buccal cavity group cancer of the pharynx was responsible for 31.5 per cent of the male deaths and for 6.5 per cent of the female deaths. Almost three-fifths, 59.5 per cent of the deaths from cancer of the skin were of males; while 40.5 per cent were females. Of the resident deaths from cancer slightly more than one-half, 50 per cent were of females.

Registered deaths from cancer showed an increase of 182 and a total of 8,862 in 1950, corresponding to a death rate of 188.6 as compared with 186.2 in 1949.

**Cerebral Hemorrhage, Cerebral Embolism and Thrombosis** were the causes of 5,427 deaths of residents, or 115.5 per 100,000 population. The death rate from these diseases has fluctuated somewhat, being 104.4 in 1946, 101.5 in 1947, 105.8 in 1948 and 113.4 in 1949. These diseases caused 5,478 registered deaths, corresponding to a rate of 116.6 per 100,000 population.

**Pneumonia** (including bronchopneumonia) caused 1,009 resident deaths in 1950 or 21.5 per 100,000 population, as compared with 1,345 deaths, or 28.9 per 100,000 population in 1949. It also was responsible for 1,016 deaths occurring in the State with a rate of 21.6 per 100,000 population.

**Nephritis**, all forms, was the cause of 732 deaths of Massachusetts residents in 1950, corresponding to a rate of 15.6 per 100,000 population, as compared with 18.4 in 1949, 40.4 in 1948, 43.7 in 1947, 44.8 in 1946 and an average rate of 58.1 for the five years from 1941 to 1945. The great decrease in these deaths is accounted for by the fact that, under the new classification of causes of death, nephritis is now included with arteriosclerotic and hypertensive heart diseases. Deaths recorded in the State from nephritis, numbered 738 or 15.7 per 100,000 population.

**Tuberculosis** in its various forms claimed 1,005 victims in 1950, of whom 948 died from tuberculosis of the respiratory system. Deaths due to the latter cause constituted 1.9 per cent of all resident deaths during the year, the rate being 20.2 per 100,000 population. In 1910 the death rate from tuberculosis of the respiratory system was 133.2. Since then the decline has been continuous from year to year with the exception of 1918 when the rate was 130. However, this disease has fluctuated during recent years, there being an increase of .8 in 1941, .6 in 1940 and .5 in 1946 over the preceding years respectively. Tuberculosis (all forms) was responsible for 1,031 deaths registered in Massachusetts including 971 deaths from tuberculosis of the respiratory system. The rates for the latter disease were 1.9 per cent of all deaths during the year and 20.7 per 100,000 population.

**Diabetes** was the cause of 1,042 deaths of Massachusetts residents in 1950, a decrease of 68 from those reported in 1949 and was responsible for a rate of 22.2 per 100,000 population. The rate from this disease has shown a steady increase from 20.0 to 36.4, per 100,000 population for the fifteen years from 1926 to 1940, but since the latter year, has fluctuated slightly as may be seen from the following rates: 1949, 23.8; 1948, 37.2; 1947, 35.8 and 1946, 35.0. Nearly two-thirds, 65.3 per cent, of the resident deaths from diabetes were of females, with the age periods 65 to 74 years having the greatest number, 24.2 per cent; of the males 12.4 per cent were in the age periods 70 to 79 years. This disease attacked persons 50 years of age and over most severely and these age groups claimed 93.7 per cent of diabetic deaths, 66.8 per cent being females and 33.2 per cent males. Deaths from diabetes reported as having occurred in the State had the same total and rate as the resident deaths.

**Congenital Debility and Malformations**, including immaturity, caused 1,197 resident deaths in 1950, corresponding to a rate of 25.5 per 100,000 population. The death rates from these causes have shown a steady decline from 109.2 in 1910 (with the exception of 1912, 114.2) to 25.5 in 1950. There were 1,242 registered deaths from these diseases resulting in a rate of 26.4 per 100,000 population.

**Alcoholism and Cirrhosis of the Liver** (specified as alcoholic, etc.) were responsible for 773 resident deaths in 1950, corresponding to a rate of 16.4 per 100,000 population. Of these 101 were due to alcoholism which is an increase of 12 over those reported in 1949, corresponding to a rate of 2.1 per 100,000 population. These diseases caused 780 deaths in Massachusetts with a rate of 16.6 per 100,000 population. Alcoholism claimed 102 of these, or 2.2 per 100,000 population.

**Maternal Mortality.** — Deaths from puerperal causes of residents of the State in 1950 totaled 53 corresponding to a rate of 5.3 per 10,000 confinements. This rate was a decrease from 1949, the rate being 6.1 and 7.4 for 1948.

**Puerperal septicemia** was responsible for 6 resident deaths not including 3 due to abortion with septic conditions, the rates for this cause in 1950 being .6 per 10,000 confinements. In 1949 the rate was 1.7 and in 1948, 2.1. Of the deaths from these causes 3 were from 20 to 29 years of age and the remainder, 3, were from 30 to 39 years of age.

**Diarrhea and Enteritis** caused 86 deaths of residents in 1950, or 1.8 per 100,000 population. Fifty-three and five-tenths per cent of the total number of deaths charged to these causes in 1950 were of infants under 2 years of age. The rates from this cause for all ages were 5.7 in 1946 and 1947, 4.2 in 1948 and 2.0 in 1949. During 1950 registered deaths totalled 87 from these causes, or 1.9 per 100,000 population. The number of infants under 2 years of age was 47 or 54 per cent of the total number claimed by these diseases.

**Principal Communicable Causes.** — The deaths from epidemic and infectious diseases have shown a great decline in the last 25 years. While certain of these diseases have fluctuated considerably during this period they have, on the whole, shown a steady decrease.

**Influenza** was responsible for 27 deaths of Massachusetts residents, or .6 per 100,000 inhabitants, as compared with 1.3 in 1945, 2.8 in 1946, 1.2 in 1947 and 1948 and .6 in 1949. The number of registered deaths was 26 or .6 per 100,000 population. In 1918 there were 13,783 deaths from this cause, corresponding to a rate of 352.7 per 100,000 population. Since 1921 this rate has fluctuated between .6 in 1949 and 27.9 in 1929.

**Whooping Cough**, one of the principal epidemic maladies of childhood, was responsible for 11 deaths of both adults and children, the number of registered deaths being the same or .2 per 100,000 population. This is an increase of 4 deaths over those reported in 1949.

**Measles**, another childhood disease, caused 2 resident deaths in 1950, or less than one-tenth of one per 100,000 population. This rate was .3 in 1949, .4 in 1948 and .3 in 1947 and 1946. The total number and rate for deaths occurring in Massachusetts were the same in 1950.

**Scarlet Fever**. — There were no deaths from scarlet fever in 1950. The rates have changed from year to year during the period 1925 to 1950, the highest being 2.8 in 1925 and the lowest, less than one-tenth of one in 1946, 1948 and 1949. There were no registered deaths from this cause in 1950.

**Diphtheria and Croup** — which are classed together in the statistics, but practically all of which are diphtheria — numbered 8 or .2 per 100,000 population. There has been a decided decrease in this disease since 1900 when the number of deaths was 1,475, with a corresponding rate of 52.6 per 100,000 inhabitants. This rate was .9 in 1949, .6 in 1948, .3 in 1947 and .8 in 1946. The total and rate for deaths registered in the State were 9 and .2 per 100,000 population.

**Epidemic Cerebrospinal Meningitis** claimed 14 victims in 1950, as compared with 9 in 1949, 16 in 1948, 12 in 1947 and 21 in 1946. The rate for this cause was .2 per 100,000 population. This disease was responsible for 13 registered deaths.

**Encephalitis Lethargica**, commonly known as sleeping sickness, is a comparatively new disease and has varied little in the last five years, the number of deaths in 1950 being 7, 6 in 1949, 6 in 1948, 5 in 1947 and 12 in 1946. The registered deaths were 6 in 1950.

**Dysentery** caused 4 resident deaths in 1950, and the number of registered deaths was 5. There were 5 in 1949, 20 in 1948, 28 in 1947 and 9 in 1946. The increase was due to a sporadic outbreak of the disease throughout the years, 1947 and 1948.

**Typhoid Fever** has shown a steady decline since 1910, having dropped from 12.2 in that year to less than one-tenth of one per 100,000 in 1946. This decline is greater, relatively, than that shown for any other important cause of death. There were no deaths due to typhoid fever in 1950 as compared with 3 in 1949, 2 in 1948, 1947 and 1946. There were no registered deaths in 1950 from this cause.

**Acute Poliomyelitis** has shown a decrease for 1950, the number of deaths being 9, or .2 per 100,000 population, as compared with 1.1 in 1949, .1 in 1948, .3 in 1947, and .4 in 1946. Deaths reported as having occurred in the State were 11 or .2 per 100,000 population.

There were no deaths from Smallpox in 1950.

**Violent and Accidental Deaths**. — Death rates from violence during the past five years per 100,000 population were 74.0 in 1946, 73.6 in 1947, 69.3 in 1948, 66.0 in 1949 and 64.5 in 1950. The death rate from violence was 64.7 per 100,000 population for registered deaths in 1950.

Resident deaths due to Railroad Accidents and Injuries totalled 30 in 1950, and corresponded to a rate of .6 per 100,000 population. The rates for the previous years were .6 in 1949, .8 in 1948, .9 in 1947 and 1.1 in 1946. Registered deaths had 31 with a rate of .7 in 1950.

Resident deaths resulting from Streetcar Accidents and Injuries numbered 2 or less than one-tenth of one per 100,000 population. The registered deaths had the same total and rate in 1950.

**Motor-Vehicle Traffic Accidents** caused 573 deaths of residents in 1950, including 6 deaths from motor vehicle and railroad collisions and 3 deaths from motor vehicle and streetcar collisions. The rate was 12.2 per 100,000 population, as compared with 10.4 in 1949, 9.9 in 1948, 11.6 in 1947 and 12.9 in 1946. These accidents caused 581 deaths registered in Massachusetts in 1950 or 12.4 per 100,000 population. Of these, 7 deaths were from motor vehicle and railroad collisions and 3 deaths from motor vehicle and streetcar collisions. No accurate data are available for measuring the death rate per number of automobiles in use, as the statistics compiled by the Department of Public Works show the number of machines registered, and thus contain duplications, since one machine may be registered more than once in a calendar year. It is probable, however, that the increase has not been so rapid as that of the number of machines in use.

**Effects of Heat.** — There were no deaths from this cause in 1950. In 1949 there were 29 deaths; in 1948, 55; in 1947, 10 and in 1946, 8. There were no deaths occurring in the State from this cause in 1950. The highest temperature recorded in 1950 was 93 degrees on June 8. The highest temperature recorded at the Weather Bureau of the United States Department of Commerce since 1900 was 104 degrees on July 4, 1911. The next highest temperature was 103 degrees on July 22, 1926.

Deaths of residents caused by Machinery Accidents in 1950 numbered 23 or .5 per 100,000 population. The corresponding figures for previous years were .9 in 1946, .8 in 1947 and .6 in 1948 and 1949. Deaths registered in Massachusetts were 26 in 1950.

The number of Suicides of Massachusetts residents in 1950 was 504, or 10.7 per 100,000 population. The rates since 1945 have been: 1946, 10.2; 1947, 11.1, 1948, 10.4 and 1949, 11.2. Reported deaths from suicide in 1950 numbered 515 or 11.0 per 100,000 population.

Resident deaths caused by firearms numbered 119 in 1950, corresponding to a rate of 2.5 per 100,000 population. Of these deaths 84 were suicides, 15 were homicides, and 20 were accidental (including those concerning which the status as to suicide, homicide, or accident was in doubt). The total reported deaths caused by firearms in 1950 were 123. These deaths included 88 suicides, 16 homicides, and 19 accidents.

Resident deaths from Homicide numbered 62 in 1950, or 1.3 per 100,000 population. The rates for homicide in recent years are 1.5 in 1946, 1.4 in 1947, 1.1 in 1948 and 1.0 in 1949. There were 63 registered deaths from homicide in 1950 with a rate of 1.3 per 100,000 population.

The causes of deaths of males and females for each month for the Commonwealth for the complete International List of Causes of Death with certain subdivisions are shown in Table 11, on pages 35 to 66. The causes denoted by decimals, shown separately, Table 11, are a part of the total cause shown in the International List. Ages, grouped in five-year periods, are shown in Table 12, on pages 68 to 129. For comparative purposes those residents of other states dying in Massachusetts are shown in Table 13 by months and age periods according to the International List while those of residents of Massachusetts dying out of the State are shown in Table 14. In Table 15, on pages 168 to 194, the deaths are shown for 58 causes and groups of causes for each county and municipality.

For the Commonwealth as a whole the deaths and death rates for the seven years 1944 to 1950 are shown for the 50 causes and groups of causes in the Abbreviated International List in Table 20, on pages 236 and 237. The relation of this list to the Detailed International List is shown in the Appendix. In addition to the above presentations, certain other tables showing the causes of death are presented on pages 238 to 253.

## DEATHS INVESTIGATED BY MEDICAL EXAMINERS.

**Source of Data.** — The statistics of deaths investigated by medical examiners published in this report are based upon annual returns made by medical examiners and associates to the Secretary of the Commonwealth of deaths supposedly due to violence, the cause and manner of which have been investigated during the year. Deaths supposedly due to violence include deaths caused by the action of chemical, thermal, or electrical agents, or following abortion, or from diseases resulting from injury or infection related to occupation, or suddenly when not disabled by recognizable disease, and those of persons found dead.

Medical examiners are often called upon to view cases in which the death was not due to violence (heart disease, apoplexy, etc.) but where the death was simply sudden or where no physician had been in recent attendance. Medical examiners are also required to certify that they have viewed bodies to be cremated, and to make personal inquiry into the cause and manner of death.

**Number of Deaths Investigated.** — The number of deaths investigated by the medical examiners in 1950 was 11,615, or 23.1 per cent of the total number of deaths which occurred during the year, as compared with 11,596 deaths in 1949 when the rate was 22.7 per cent. Almost two-thirds (63.8 per cent) of these deaths were of males. Of the deaths investigated by medical examiners, 2,793, or 24.0 per cent, were reported as due to violence, while among the deaths returned to the registrars, 3,039 were reported as due to violence.

The largest number of cases investigated by medical examiners in 1950 was in Suffolk County, 2,371, as compared with 2,397 in 1949. Of the deaths investigated in Suffolk County, 660, or 27.9 per cent, were reported as due to violence (see Table 39, pages 264 and 265).

**Autopsies.** — Autopsies were made in 1,009, or 8.7 per cent of the cases investigated by the medical examiners in 1950, as compared with 8.8 per cent in 1949, 8.3 per cent in 1948, 9.8 per cent in 1947 and 11.4 per cent in 1946.

The highest proportion of autopsies was in Suffolk County where 21.8 per cent of the views were autopsied, there being 23.6 per cent in 1949. Table 40, on pages 264 and 265 shows the number of views and the number of autopsies in each county in each year from 1941 to 1950, and the number and per cent of views autopsied for the ten-year period, 1941 to 1950.

**Cause of Death.** — Over one-half (65.5 per cent) of the deaths viewed by medical examiners in 1950 were from causes not due to violence, 24.0 per cent were due to violence, and .4 per cent were stillbirths. One thousand, one hundred and seventy-six or 10.1 per cent of the views were for cremations.

Deaths from causes not due to violence numbered 7,604, of which 7,399 were from natural causes and 97 were due to alcoholism.

Deaths due to violence numbered 2,793, of which 2,222 were due to accident and poisoning, 514 were suicides, and 57 were homicides.

Of the 2,222 deaths due to accident and poisoning, 989 were due to falls, 490 were due to automobile accidents, 6 of which were railroad and automobile collision, 135 resulted from drowning, 27 were due to railroad accidents, and 581 to other causes. There were 3 streetcar and automobile collisions.

**Suicides** numbered 514, or 18.4 per cent of the deaths due to violence. Suicides committed by the use of illuminating and other gases, 156, and by hanging or strangulation, 132, constituted over one-half (56 per cent), of the total number. The number of suicides by firearms was 90; by poisons, 47; by drowning, 35; and other methods, 57. Almost three-fourths (72.2 per cent) of the suicides were males.

Of the 514 persons committing suicide, 112 were 40 to 49 years of age, 108 were 50 to 59 years of age, 93 were 60 to 69 years of age, 82 were 30 to 39 years of age, 46 were 20 to 29 years of age, 61 were over 70 years of age, and 12 were under 20 years of age. Among the male suicides the largest numbers were from 40 to 49 years of age, 86; and from 50 to 59 years of age, 81; and among the female suicides the largest numbers were from 30 to 39 years of age, 33; and 50 to 59 years of age, 27. The most common method of committing suicide was by hanging or strangulation, 132.

**Homicides** numbered 57, of which 20 were by firearms, 8 were by cutting or piercing instruments, 22 by other means, and 3 were cases of infanticide. Of the 57 homicides, 36 or 63.2 per cent were males.

FROM EACH CAUSE AND CLASS OF CAUSES, ACCORDING TO THE  
DETAILED INTERNATIONAL LIST, BY MONTHS AND SEX: 1950.

Detailed Int. List No.	CAUSE OF DEATH.	SEX.	Total.	MONTHS.											
				January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.
842	Accident to pedestrian caused by bicycle	T	3	-	-	-	-	-	-	-	-	-	-	-	-
		M	1	-	-	-	-	-	-	-	-	-	-	-	-
		F	2	-	-	-	-	-	-	-	-	-	-	-	-
843	Accident to rider of bicycle not involving collision with motor vehicle	T	3	-	-	-	-	-	-	-	-	-	1	1	-
		M	3	-	-	-	-	-	-	-	-	-	-	1	-
		F	-	-	-	-	-	-	1	-	-	-	-	-	-
845	Other nonmotor road-vehicle accidents	T	2	-	-	-	-	-	-	-	-	-	-	-	-
		M	1	-	-	-	-	-	-	-	-	-	1	-	-
		F	1	-	-	-	-	-	-	-	-	-	-	-	-
850	Drowning of occupant of small boat	T	18	-	-	-	-	-	-	1	-	-	-	-	-
		M	17	-	2	-	-	2	3	5	1	-	2	2	-
		F	1	-	-	-	-	-	-	-	-	1	-	-	-
851	Other water-transport injury by drowning	T	1	-	-	-	-	-	-	-	-	-	-	-	-
		M	1	-	-	-	-	-	-	-	1	-	-	-	-
		F	-	-	-	-	-	-	-	-	-	-	-	-	-
852	Fall on stairs and ladders in water transport	T	1	-	-	-	-	-	-	-	-	-	-	-	-
		M	1	-	1	-	-	-	-	-	-	-	-	-	-
		F	-	-	-	-	-	-	-	-	-	-	-	-	-
853	Other falls from one level to another in water transport	T	1	-	-	-	-	-	-	-	-	-	-	-	-
		M	1	-	-	-	-	-	-	-	-	-	1	-	-
		F	-	-	-	-	-	-	-	-	-	-	-	-	-
857	Other specified accidents in water transport	T	1	-	-	-	-	-	-	-	-	-	-	-	-
		M	1	-	-	-	-	1	-	-	-	-	-	-	-
		F	-	-	-	-	-	-	-	-	-	-	-	-	-
860	Accident to personnel in military aircraft	T	5	-	-	-	-	-	-	-	-	-	-	-	-
		M	5	-	1	-	-	3	1	-	-	-	-	-	-
		F	-	-	-	-	-	-	-	-	-	-	-	-	-
861	Injury to occupant by accident to commercial "transport" aircraft	T	1	-	-	-	-	-	-	-	-	-	-	-	-
		M	1	-	-	-	-	-	-	-	-	1	-	-	-
		F	-	-	-	-	-	-	-	-	-	-	-	-	-
863	Injury to occupant by accident to other aircraft	T	4	-	-	-	-	-	-	-	-	-	-	-	-
		M	3	-	-	-	1	-	-	-	-	-	-	2	-
		F	1	-	-	-	-	-	-	-	-	-	-	1	-
866	Other and unspecified aircraft accidents	T	2	-	-	-	-	-	-	-	-	-	-	-	-
		M	2	-	1	-	-	-	-	-	1	-	-	-	-
		F	-	-	-	-	-	-	-	-	-	-	-	-	-
871	Accidental poisoning by barbituric acid and derivatives	T	19	-	-	-	-	-	-	-	-	-	-	-	-
		M	6	-	-	1	-	2	-	-	2	-	-	-	1
		F	13	-	2	3	3	-	-	1	1	-	1	-	2
872	Accidental poisoning by aspirin and salicylates	T	1	-	-	-	-	-	-	-	-	-	-	-	-
		M	-	-	-	-	-	-	-	-	-	-	-	-	-
		F	1	-	-	-	-	-	-	-	-	-	-	1	-
874	Accidental poisoning by other analgesic and soporific drugs	T	6	-	-	-	-	-	-	-	-	-	-	-	-
		M	4	2	-	-	-	-	-	-	-	-	-	1	1
		F	2	1	-	-	-	-	1	-	-	-	-	-	-
875	Accidental poisoning by sulphonamides	T	1	-	-	-	-	-	-	-	-	-	-	-	-
		M	-	-	-	-	-	-	-	-	-	-	-	-	-
		F	1	1	-	-	-	-	-	-	-	-	-	-	-
878	Accidental poisoning by other and unspecified drugs	T	3	-	-	-	-	-	-	-	-	-	-	-	-
		M	1	-	-	-	-	-	-	-	-	-	-	1	-
		F	2	-	1	-	-	-	1	-	-	-	-	-	-
880	Accidental poisoning by alcohol	T	2	-	-	-	-	-	-	-	-	-	-	-	-
		M	2	-	1	-	-	1	-	-	-	-	-	-	-
		F	-	-	-	-	-	-	-	-	-	-	-	-	-
881	Accidental poisoning by petroleum products	T	2	-	-	-	-	-	-	-	-	-	-	-	-
		M	2	-	-	1	1	-	-	-	-	-	-	-	-
		F	-	-	-	-	-	-	-	-	-	-	-	-	-
885	Accidental poisoning by lead and its compounds	T	3	-	-	-	-	-	-	-	-	-	-	-	-
		M	2	-	-	-	-	-	-	-	1	-	1	-	-
		F	1	-	-	-	-	-	-	-	-	-	-	-	-
888	Accidental poisoning by other and unspecified solid and liquid substances	T	11	-	-	-	-	1	-	-	-	-	-	-	-
		M	6	-	-	2	-	1	-	-	1	1	1	-	-
		F	5	1	-	1	1	-	-	1	-	-	-	1	-
890	Accidental poisoning by utility (illuminating) gas	T	79	-	-	-	-	-	-	-	-	-	-	-	-
		M	48	2	7	6	6	6	-	2	3	4	2	6	4
		F	31	4	4	1	4	2	1	2	-	1	5	2	5
891	Accidental poisoning by motor-vehicle exhaust gas	T	7	-	-	-	-	-	-	-	-	-	-	-	-
		M	6	-	2	3	-	-	-	-	1	-	-	-	-
		F	1	-	1	-	-	-	-	-	-	-	-	-	-
892	Accidental poisoning by other carbon monoxide gas	T	10	-	-	-	-	-	-	-	-	-	-	-	-
		M	7	-	-	2	-	3	-	-	-	-	1	-	1
		F	3	1	-	-	-	2	-	-	-	-	-	-	-

Table 11

ALLOCATED DEATHS (EXCLUSIVE OF STILLBIRTHS)  
FROM EACH CAUSE AND CLASS OF CAUSES, ACCORDING TO THE  
DETAILED INTERNATIONAL LIST, BY MONTHS AND SEX: 1950.

Detailed Int. List No.	CAUSE OF DEATH.	SEX.	Total.	MONTHS.											
				January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.
894	Accidental poisoning by other specified gases and vapors	T	2	-	-	-	-	-	-	-	-	-	-	-	-
		M	2	-	-	-	-	-	1	-	-	-	-	1	-

TABLES 16, 17 AND 18 WHICH FOLLOW HAVE BEEN PREPARED IN PART FROM A LIST SUPPLIED BY THE NATIONAL SAFETY COUNCIL AND SHOW DEATHS FROM VIOLENCE BY PLACE OF OCCURRENCE, TYPE OF ACCIDENT, AGE, MONTH AND SEX.

REGISTERED DEATHS FROM IMPORTANT VIOLENT CAUSES BY PLACE OF OCCURRENCE: 1950.

	Total.	Suicide and self-inflicted injury, 963, 970-979.	Homeicide, 964, 980-985.	Railway accidents (except collisions with motor vehicles), 800-802.	Collisions between motor vehicles and railway trains, 810.	Collisions between motor vehicles and streetcars, 811.	Motor-vehicle traffic accidents, 812-825.	Motor-vehicle nontraffic accidents, 830-835.	Streetcar and other road-vehicle accidents, 840-845.	Aircraft accidents, 860-866.	Accidents caused by machinery, 912.	Accidental poisonings by utility (illuminating) gas, 890.	Accidental poisonings by other gases and vapors, 891-895.	Accidental poisonings by solid and liquid substances, 870-888.	Accidents caused by fire, explosion of combustible material, etc., 916, 917.	Accidents caused by mechanical suffocation, 924, 925.	Water-transport accidents, drowning, 850, 851.	Accidents caused by drowning, 929.	Accidents caused by firearms, 919.	Accidental falls on stairs and from ladders, 900, 901.	Accidental falls from one level to another, 902.	Other and unspecified accidental falls, 903, 904.	All Others.

## INTRODUCTION.

**Birth Registration.** — Birth registration has been compulsory in Massachusetts since Colonial times. It was one of the first States to be included in the registration area of the United States Census Bureau.

The physician\* in attendance at the birth of a child is required, within forty-eight hours, to give notice and make a complete return within fifteen days of the facts required for record to the clerk of the town of birth. Parents, within forty days are required to give notice to the registration official of children born to them.

In addition to the above, persons in charge of a hospital, almshouse, or other institution, public or private, are required to give, on or before the fifth day of each month, notice to the town clerk of every birth occurring among the persons in such institution during the preceding month. The law also provides that the clerk of each town may annually in January ascertain the facts required for record of all children born in his town during the preceding year and resident therein.

Returns are made in the first instance to the local clerks of the city or town in which the birth occurred with the exception of Boston where the City Registrar is the official in charge.

The records on file in the Division of Vital Statistics are attested copies of the originals filed with local officials. The law has required the filing at this central record office since 1842. During this time 6,557,448 births have been filed and indexed. Since the establishment of the office of State Registrar of Vital Statistics in 1918, a systematic campaign has been carried on to obtain prompt and complete compliance with the birth registration laws. People are beginning more and more to realize the importance of birth records, so complete registration should soon be an accomplished fact.

**Importance of Birth Records.** — Records of birth are becoming more important every day. Government and other agencies are demanding proof of citizenship through birth certificates. This has caused a tremendous increase in the issuance of certified copies of birth records. The applications for certified copies are being made in person and by mail from all parts of the country. As Massachusetts is one of the few states that have records previous to 1912 there is a great demand at all times. This great demand for birth records will continue as they are also required for Old Age Assistance, Social Security and for allotment purposes.

There is hardly a relation of life, social, legal, or economic, in which the evidence furnished by an accurate registration of births may not prove to be of the greatest value, not only to the individual, but also to the public at large. It is not only an

\*Midwives are not recognized in Massachusetts. The courts have held that the practice of midwifery is the practice of medicine, and as there is no provision under the law for licensing midwives, any one who practices midwifery is violating the medical registration laws.

act of civilization to register Birth Certificates, but also good business, for they are frequently used in many practical ways:

1. As evidence to prove the age and legitimacy of heirs;
2. As proof of age to determine the validity of a contract entered into by an alleged minor;
3. As evidence to establish age and proof of citizenship and descent; in order to vote;
4. As evidence to establish the right of admission to the professions and to many public offices;
5. As evidence of legal age to marry;
6. As evidence to prove the pension claims of widows and orphans;
7. As evidence to determine the liability of parents for the debts of a minor;
8. As evidence in the administration of estates, the settlement of insurance and pensions;
9. As evidence to prove the irresponsibility of children under age for crime and misdemeanor, and various other matters in the criminal statute;
10. As evidence in the enforcement of laws relating to education and to child labor;
11. As evidence to determine the relations of guardians and wards;
12. As proof of citizenship in order to obtain a passport;
13. As evidence in the claim for exemption from or the right to jury and military service.

Copies of records of births occurring during the preceding year are required by statute to be forwarded annually to the Division of Vital Statistics but many of the clerks co-operate with the Division by making periodic returns during the year.

After the statutory period has elapsed for filing copies of the records with the Department of the Secretary of the Commonwealth, no delayed returns are accepted unless by affidavit made by the parents, supported by written evidence at the time of birth, or by affidavit of the attending physician at the time of birth, or based upon a writing made at the time by a person since deceased charged with making the return in the first instance, except that in cases of delayed returns when no deponent is available the clerk may under the provisions of Chapter 542, Acts of 1945, accept a return without affidavit on written evidence satisfactory to him and if he rejects an affidavit for filing a delayed return, the person concerned can appeal to a Probate Judge in the county in which the birth occurred, and if the Probate Judge orders the birth to be recorded, the clerk is then required to make a record of the birth. As the evidential value of a record depends for its authenticity upon the fact that it is made contemporaneously with the happening of the event recorded, the registrars are required to exercise considerable care by requesting written evidence made soon after the time of birth before accepting delayed returns, particularly if it is some years after the birth occurred. This holds true of corrections which can only be made in accordance with the facts as they actually existed at the time the birth occurred, with the exception of an illegitimate child who is legitimized through the subsequent marriage of its parents; in these cases the record may be amended, so that the child will appear on the record as the legitimate offspring of its parents.

As a means of eliminating errors from physicians' returns of births, Chapter 434, Acts of 1941 requires that registrars send a supplemental report of the physician's return to the parents for their verification; and when the certificate is returned properly signed by a parent it is filed with the physician's certificate. This is a splendid system as it eliminates any claim later that an error has been made in the return of birth.

**Adoptions.** — Chapter 97, Acts of 1938 amended the statute relating to adoptions and provides that legally adopted children may have their birth records amended so as to appear as the natural children of the adoptive parents. Illegitimate children who have had their names legally changed may have their birth records amended to agree with the name decreed by court.

**Certain Records Impounded.** — Returns and records of illegitimate and abnormal sex births are impounded by statute from inspection. The law prohibits the issuance of copies of such records to the general public. These records can be inspected by or copies issued only to the child, the mother, attorney for the child, its legal guardian or to others by order of the court. Chapter 65, Acts of 1945 provided that in cases of illegitimate records which have been amended to appear as legitimate records through intermarriage of the parents or by adoption, no notation shall appear on certified copies that are issued that amendment has been made. This is a further protection to the illegitimate child.

**Treatment of Infants' Eyes after Birth.** — Chapter 46, Acts of 1943 requires attending physician to record on the birth certificate the use of a prophylactic remedy with which he has treated the eyes of a child whose birth he has personally attended.

**Allocation.** — Births are charged to the place of the event and also are allocated to the place of residence of the parents. This insures as near a true rate as possible and has a marked effect on municipalities which are large hospital centers. These cities and towns in the past have been charged with a high rate and small communities without hospital facilities have shown a low rate. The usual place of residence has been used as a basis for all births occurring outside the State as well as for those in the State. In the case of institutions, births have been allocated to the place of residence before entrance.

**Live Births.** — In the Commonwealth in 1950 there were 96,693 live births registered, a decrease of 835 or .9 per cent as compared with the number registered in 1949. The allocated births numbered 95,619 for 1950.

**Birth Rate.** — In proportion to the total population, the total births registered were equivalent to a rate of 20.6 per 1,000 population, and is a decrease of .3 per 1,000 from that of 1949. This rate is .4 per 1,000 below the average for the five years 1945 to 1949. The allocated births for 1950 had a birth rate of 20.3.

**Changes in Birth Rate.** — The birth rate for the Commonwealth attained the highest point on record, 30.2 in the year 1857. Since then the rate, although fluctuating considerably, has shown a marked decline, and a gradual decline since 1924. Starting with 1940 the trend has been upward with the exception of 1944 and 1945, culminating in the highest number of recorded births, in the history of the State, in 1947. Though the registered births in 1948 and 1949 are below this all-time high, they are still larger than the previous recorded high of 95,731 in 1919. During this period the infant death rate has also declined, the infant mortality rate for 1950 being the lowest ever recorded, so that the number of babies who survive the dangers of infancy is becoming steadily greater. This fact is shown in the infant mortality tables.

**Stillbirths.** — Chapter 113, Acts of 1945, defines stillborn children for the purposes of Vital Statistics: "A stillborn child shall be deemed to be a foetus born after a period of gestation of not less than 20 weeks, in which foetus there is no attempt at respiration, no action of heart and no movement of voluntary muscle —." Previous to 1936 there was no statute defining a stillbirth, consequently many returns had been made which, under this definition, would not have been returned. The statute now clearly defines a stillbirth and precludes any misunderstanding as to what returns should be made.

Stillbirths allocated in 1950 numbered 1,815. The rate per 1,000 live births allocated was 18.5 in 1949, 19.3 in 1948, 19.9 in 1947 and 22.0 in 1946. The rate for 1950 is 19.0.

**Birth Rates, Highest.** — The six municipalities having 15,000 inhabitants or more showing the highest registered birth rates in 1950 are: Winchester, 64.6; Norwood, 57.2; Stoneham, 47.5; Chelsea, 46.6; Milford, 46.0 and Weymouth, 44.6.

Variations in the birth rates of different communities may be partially accounted for by differences in the proportions of married women of child-bearing age residing therein, and by the presence of hospitals to which expectant mothers go from neighboring cities and towns in order to take advantage of the best medical advice and obstetrical care during pregnancy and childbirth. The allocated birth rates help to substantiate this statement. The communities showing the highest rates are: Woburn, 27.8; Natick, 27.2; Greenfield and Weymouth, 23.8; Everett, 22.9; Pittsfield, 22.6 and Leominster and Waltham, 22.3. Springfield which showed the second highest registered rate (31.2) of any place in the State of over 100,000 population has the highest rate (21.0) through the allocation of births.

**Sex Proportion at Birth.** — It has never been determined whether the higher proportion of masculine than of feminine births is the result of definite causes or not. Registered births of males in 1950 numbered 49,960 and those of females 46,733, corresponding to a ratio of 1,069 male births to 1,000 female births. Allocated births numbered 49,416 males and 46,203 females in 1950, with 1,070 as a ratio of male to female births.

**Plural Births.** — In 1950 there were 1,062 cases of plural births (allocated), 1,050 cases of twins and 12 cases of triplets, or 11.0 pairs of twins per 1,000 live births (allocated), and .1 of one case of triplets.

**Natural Increase.** — The excess of the birth rate over the death rate shows the ratio at which the community is reproducing itself by natural increases. In every year since the compilation of birth statistics was started the birth rate has been higher than the death rate.

The rate of natural increase for 1950 was 9.7 per 1,000 population for registered births and also averaged 9.7 for the five years 1945 to 1949. The rate of increase was 9.6 for allocated births in 1950.

The number of births is greatly in excess of the number of deaths, and this fact coupled with the steady decrease in infant mortality, has resulted in a net gain in the natural increase in population. The excess of births over deaths amounted to 90.9 per cent in 1949; 89.1 per cent in 1948; 106.8 per cent in 1947; 89.9 per cent in 1946 and 50.6 per cent in 1945. The excess of registered births over registered deaths in 1950 was 45,602 or 89.3 per cent, while the increase of allocated births over allocated deaths was 45,260 or 89.9 per cent.

For comparisons previous to 1900 relative to the natural increase from 1851, and for figures from that date up to and including 1919, reference may be made to the Annual Report of Vital Statistics of Massachusetts for the year ending December 31, 1919, Public Document No. 1.

## INTRODUCTION.

**Marriage Registration.** — The public registration of marriages has been required for many years in Massachusetts. Records of marriage are made in the first instance in the cities and towns of the State where the contracting parties dwell and if the ceremony is solemnized in a town other than where the parties reside, in the town where the ceremony is performed.

Since 1841 it has been required that copies of these records be forwarded annually to the Secretary of the Commonwealth, but many City and Town Clerks co-operate by making periodic returns throughout the year. From 1841 to 1950, inclusive, there have been 5,552,136 marriages reported, recorded and tabulated in this department.

**Source of Data.** — The marriage statistics in this report are compiled from attested copies of the records of marriages recorded in every city and town. Persons intending to be joined in marriage in Massachusetts must file a notice of intention in the town in which they respectively dwell, and this notice of intention must contain the facts required for record and be sworn to by each of the parties to the marriage. Chapter 561, Acts of 1943 provides that in cases of persons, one or both of whom is in the armed forces, such notice may be given by either party, provided one is a resident. If a marriage is performed in a town other than the town issuing the license, a copy of the license is required to be made and forwarded by the clergyman or magistrate to the clerk of the municipality in which the ceremony was performed. Five days after the notice of intention has been filed, unless a court waives the requirement, the marriage license may be issued with all the facts set forth in the notice of intention which are required for record. This certificate is presented to the clergyman or magistrate before whom the marriage is performed, and the facts as to the ceremony are certified by that person. Between the first and tenth days of the month following the ceremony the license or licenses are required to be returned by the clergyman or magistrate to the office or offices issuing the same.

**Increase of Marriages.** — There has been an increase in the number of marriages solemnized in 1950, 41,711 which was 2,072 more than 1949. The three previous years showed a greater number however, in 1948 there were 45,940, in 1947 49,803, and in 1946, 56,948.

**Solemnization.** — A marriage may be solemnized in any place within the Commonwealth by a minister of the gospel who resides in the Commonwealth, or, who if a non-resident is the pastor of a church or denomination duly established in the Commonwealth and who is recognized by his church or denomination as duly ordained and in good and regular standing as a minister of such church or denomination; by a rabbi of the Israelitish faith, duly licensed by a congregation of said faith established in the Commonwealth, who has filed with the clerk or registrar of the city or town where such congregation is established a certificate of the establishment of the synagogue therein, the date of his appointment thereto, and of the term of his engagement; by a justice of the peace if he is also clerk or assistant clerk of a city or town, or a registrar or assistant registrar, in the city or town where he holds such office, or, if he is also clerk or assistant clerk of a court, in the city or town where the court is authorized to be held, or, if he has been designated as a justice of the peace to solemnize marriages in the city or town where he resides; and it may be solemnized among Friends or Quakers according to the usages of their societies;

and it may be solemnized among the Baha'is, by the Chairman of an incorporated local spiritual assembly of the Baha'is according to the usage of their society; and a specified marriage may be performed by a non-resident clergyman commissioned by the Governor in accordance with the provisions of General Laws, Chap. 207, Sec. 39; but no person shall solemnize a marriage in the Commonwealth unless he can read and write the English language.

Chapter 249 of the Acts of 1949 provides that ordained deacons in the Methodist Church may solemnize marriages.

Chapter 273 of the Acts of 1946 provides for filing evidence of marriage of residents of Massachusetts who have been married in another State or without the United States, with the city or town clerk of their place of domicile at the time of the marriage.

Chapter 561 of the Acts of 1943 provides for premarital blood examination. Certificates of medical examinations must be presented by both parties to the intended marriage before the marriage certificate is issued. If the test is positive it does not prevent the marriage but the physician is required to inform the parties when the result is positive.

**Accuracy.** — The registration of marriages presents fewer difficulties than the registration of birth and death records and the statistics should be nearly 100 per cent perfect.

Every precaution has been taken to see that the statutes pertaining to the solemnization of marriage are strictly enforced, but as there is no public registration of ministers of the gospel in Massachusetts, it is not always possible to get in touch with the persons responsible for making returns of marriages solemnized by them. To guard against the possibility of marriages being performed on one license where two are required, on an out-of-state license, or on a license that has become invalid because of lapse of time, copies have been prepared of the marriage laws and are forwarded, upon request, to all persons interested, and are sent to the city and town clerks, together with posters setting forth the legal impediments to marriage, which are required to be posted in their offices.

The errors in solemnizing and returning a record of marriage, if any, are due to the lack of information as to the requirements of the statute rather than to any willful attempt to evade the requirements of the law.

Marriage licenses issued to residents are valid throughout the Commonwealth, regardless of the residence of either party and many marriages are performed in cities and towns other than the place where either party lived. Persons who do not reside in the Commonwealth must file their intention with the clerk of the city or town where they propose to have the marriage solemnized and the marriage must be solemnized in that particular municipality.

The principal source of error in the records of marriage comes about through the carelessness or ignorance of one of the parties in filing the notice of intention as to the facts concerning the other party. Therefore, it sometimes happens that records for the same marriage coming from different towns do not contain the same information. Names and other facts will be at variance. These certificates are compared in the Division of Vital Statistics and every effort is made to have the certificates agree, but considerable confusion and delay follow from this situation.

**Purpose.** — The practical purposes of marriage records are:

1. As evidence to establish dower and curtesy rights of husband and wife.
2. To prove legality as to claims of inheritance.
3. As evidence upon which to base subsequent records concerning the parties.
4. For Governmental pension purposes.
5. For pensions under Employees Pension Laws.
6. For insurance, pension and retirement purposes.
7. To establish legal settlement for public aid and the settlement of dependent children of parents.
8. For naturalization and passport purposes.
9. To prove legitimacy of children.

The following tables contain the number of marriages solemnized:

Table 47

COUNTIES AND MUNICIPALITIES. <sup>1</sup>	MARRIAGES, CLASSIFIED BY NATIVITY OF BRIDE AND GROOM, IN EACH COUNTY AND MUNICIPALITY: 1950.					MARRIAGES, CLASSIFIED BY RESIDENCE OF BRIDE AND GROOM, IN EACH COUNTY AND MUNICIPALITY: 1950.			
	NATIVITY.

Statistical tables . . . . .	299-317

## INTRODUCTION.

**Causes for Divorce.** — Causes for which divorce from the bonds of matrimony may be granted in Massachusetts under the provisions of Chapter 208, Sections 1 and 2 of the General Laws, are as follows:—

1. Adultery.
2. Impotency.
3. Desertion for three consecutive years next prior to the filing of the libel.
4. Gross and confirmed habits of intoxication caused by the voluntary and excessive use of intoxicating liquor, opium or other drugs.
5. Cruel and abusive treatment.
6. Neglect to provide.
7. Sentence to imprisonment at hard labor for five years or more.

A marriage may be declared void in consequence of violation of the provisions of the laws concerning marriage; that is, a separation may be granted because of the demonstration of conditions obtaining at the time of, or previous to, the alleged divorce, which show that there never was a legal marriage.

**Source of Data.** — The statistics of divorce presented in this report are compiled from returns made to the Secretary of the Commonwealth annually by the clerks of courts and registers of probate for the several counties.

In Massachusetts there is no central record office for divorces, the statistics only being returned as stated above. The records remain with the clerks or registers.

Previous to 1922 the superior court only had jurisdiction in such matters. Under the provisions of General Laws, Tercentenary Edition, Chapter 208, the probate court now has concurrent jurisdiction with the superior court to hear libels for divorce and to determine the same in a similar manner.

**Applications for Divorce.** — The courts granted over 4 petitions out of every 5 filed. This proportion fluctuated considerably during the twenty-five years from 1926 to 1950, the highest proportion of applications being granted in 1940 (90.7 per cent), and the lowest proportion in 1929 (71.1 per cent). During this entire period 86.3 per cent of all applications were granted, .5 per cent were refused, and 13.2 per cent were dismissed.

**Contested Cases.** — Of the total number of applications for divorces during the twenty-five years from 1926 to 1950, only 31.2 per cent were contested. In 1950, of the 7,357 applications for divorce, only 2,652 or 36 per cent, were contested, and of the 6,365 divorces granted, 2,098 or 33 per cent, were contested. The proportion of contested cases is larger for divorces granted to the wife (33.9 per cent) than for those granted to the husband (29.6 per cent).

**Number of Divorces.** — Divorces granted in 1950 numbered 6,365, a decrease of 322, or 4.8 per cent less than the number granted in 1949, and 1,815 less than the average number granted for the five-year period 1945 to 1949.

**Divorce Rates.** — The number of divorces granted per 100,000 population was 135.4 as compared with 143.5 in 1949, 161.6 in 1948, 214.6 in 1947 and 221.4 in 1946.

Divorce rates based on the married population, i.e., the number of divorces per

100,000 married population, are more significant than rates based upon the total population, because of the elimination of possible variations in the proportion married, and because of the fact that divorce can arise only among the married. Rates calculated in this manner are shown in Table 63, page 314, for the census years 1920 to 1945. In this table the number of divorces shown for the census years 1920 to 1945 is not the actual number in that year, but the annual average for the five-year period of which the census year is the median. This method eliminates any peculiarities in the census year which may have affected divorce and makes the figures more typical of the period as a whole.

**Party to Which Granted.** — Over three-fourths (75.6 per cent) of the total number of divorces in the period 1926 to 1950 were granted to the wife. In other words, divorces obtained by the wife are more than twice as numerous as those obtained by the husband. It may be that husbands more often than wives give occasion for divorce but the difference may be partially explained by the fact that without any reference to the question of which party is the more frequently responsible for the marital unhappiness, the wife has more legal grounds for divorce than the husband, because certain well known and comparatively common grounds are more readily applicable against the husband than against the wife. For example, neglect to provide, a common legal cause for divorce on the part of the wife, and cruelty, in so far as it is physical cruelty, are not ordinarily available grounds for a husband, although men are sometimes granted divorces on the ground of cruelty.

Moreover, where each party desires divorce, it is more likely that the wife, more often than the husband will make the application, since a cause for which the wife would be granted a divorce might reflect less favorably upon the parties than would a cause for which the husband might be granted a divorce.

The proportion of divorces granted to the wife fluctuated between 72.3 per cent in 1946, and 78.4 in 1950, as compared with 75.6 per cent for the entire period of 1926 to 1950.

**Divorces Classified by Causes.** — The statistics concerning the cause of divorce deal with the legal cause as ascertained from the court records. It should be borne in mind, however, that the cause for which a divorce is granted by the courts is not necessarily the underlying reason for the marital unhappiness, and that the value of statistics of divorce as an index to the actual causes is as a consequence impaired.

Divorces granted on the ground of desertion have decreased 15.6 per cent in the twenty-five-year period 1926 to 1950, while the number of divorces granted for adultery has decreased slightly more than one-half.

The most common ground on which divorce was granted by the courts was cruel and abusive treatment, which accounted for 58.4 per cent of all the divorces granted in the period 1926 to 1950, for 35 per cent of all those granted to the husband in this period, and for 65.9 per cent of those granted to the wife.

The number and per cent of divorces granted for all causes, to the husband and to the wife, for the twenty-five-year period 1926 to 1950, are shown in Table 65, page 315.

**Annulled Cases.** — Among the less important classes of cases appears the term "Annulments." In 2,620 cases, or 2.1 per cent of the total number of divorces granted during the period 1926 to 1950, there was some cause shown which may have existed at the time of marriage. These cases form but a small proportion of all cases considered, and do not affect the results to any material degree.

**Duration of Marriages.** — The average number of years libellants were married at the time of application for divorce has fluctuated between 11.6 years in 1944 and 9.6 years in 1947. The average number of years the libellants were married in 1950 was 9.8.

Of the total libellants in Massachusetts for whom the number of years married was reported in 1950, 61.4 per cent made application for divorce before they had been married ten years, as compared with 59.6 in 1949, 60.1 in 1948, 62.4 in 1947, 63.2 in 1946 and 57.1 for the twenty-five-year period 1926 to 1950.

POPULATION STATISTICS

	PAGE
Introductory . . . . .	318
Estimated population . . . . .	318
Statistical table . . . . .	319

**Introductory.** — All vital statistics are based upon the population. The number of births, marriages, divorces and deaths is expressed in relation to the population, usually as rates giving the number occurring during the calendar year per 1,000 inhabitants or group of inhabitants, such as age groups, sex, nativity, race, marital condition, and occupation groups.

Information regarding population is obtained by a census enumeration, and in Massachusetts these enumerations are made every five years. The statistics for 1950 in this report are based on the Federal census taken as of April 1, 1950.

The population of any community or State is continually changing, in most cases increasing, and for this reason it becomes necessary to make estimates of the population for the periods between the census enumerations upon which to base rates for the various vital events, and especially for the accurate computation and expression of birth, marriage, divorce, and death rates. Such estimates are necessary for all dates except those on which the census enumerations are made, and are in all cases preferable to a repetition of the census returns for a certain year.

For non-census years the statistical tables in this book are based upon the estimated population as determined by the arithmetical method, which assumes a constant amount of increase between the census years.

**Estimated Population.** — The method of calculating estimates of population for the intercensal years is shown in the following example:

Massachusetts had a population of 4,690,514 at the Federal census of 1950 (April 1), and of 4,316,721 at the Federal census of 1940 (April 1). The increase during the intercensal period (10 years) was 373,793, and the monthly increase according to the arithmetical method of estimating population, was —

$$\frac{4,690,514-4,316,721}{120}=3,114.9$$

The same annual increase is also assumed to occur until the next census shall have been taken. The population for July 1, 1950 is estimated by adding to the population as it existed at the preceding census (April 1, 1950), 3,114.9 for each month intervening between the date of enumeration and the date for which the estimate is desired (July 1, 1950). There being 3 months between these dates, the calculation would be

$$4,690,514+(3\times 3,114.9)=4,699,859$$

The census population for each municipality in the Commonwealth having over 15,000 inhabitants in 1950 is shown on page 319.

## APPENDIX

### INTERNATIONAL STATISTICAL CLASSIFICATION OF DISEASES, INJURIES, AND CAUSES OF DEATH 1. DETAILED INTERNATIONAL LIST 2. ABBREVIATED LIST

### INTERNATIONAL STATISTICAL CLASSIFICATION OF DISEASES, INJURIES, AND CAUSES OF DEATH.

There are two separate and distinct classifications of causes of death embodied in the International List of Diseases, Injuries, and Causes of Death, these are the detailed and abbreviated International Lists. The former, as indicated by its name, presents causes of death in greater detail than does the latter; that is, it shows separately certain diseases which in the abbreviated list are grouped together for presentation. The majority of the titles of the abbreviated list are therefore consolidations of certain titles of the detailed list. The shorter list is used as a basis for certain tables in this volume for which it is either unnecessary or impracticable to present data for each disease and cause of death shown in the detailed list.

The second decennial revision of the International Classification of Causes of Death was made at Paris, July 1 to 3, 1909. The next revision was also made at Paris, October 11 to 14, 1920, and was used beginning with 1921. The causes of death as given in the fourth revision number 214, compared with 179 in the first, 189 in the second, and 205 in the third classification. The fifth revision of the International List of Causes of Death is largely a revision of the previous edition and is based upon the translation of the official French version of the proceedings of the International Commission of 1938. Compiled under the auspices of the World Health Organization by a group of recognized experts on health statistics, the Classification was unanimously accepted by the Sixth Decennial Revision Conference, held in Paris in April, 1948.

The following table shows each title of the Detailed International List:—

#### 1. DETAILED INTERNATIONAL LIST.

- |   |   |
|---|---|
| <p><b>I. INFECTIVE AND PARASITIC DISEASES</b></p> <p>001. Respiratory tuberculosis with mention of occupational disease of lung.</p> <p>002. Pulmonary tuberculosis.</p> <p>003. Pleural tuberculosis.<br/>(0) Pleurisy specified as tuberculous.<br/>(1) Pleurisy with effusion without mention of cause.</p> <p>004. Primary tuberculosis complex with symptoms.</p> <p>005. Tracheobronchial glandular tuberculosis with symptoms.</p> <p>006. Radiological evidence suggestive of active respiratory tuberculosis not classifiable elsewhere.</p> <p>007. Other respiratory tuberculosis.</p> <p>008. Tuberculosis, unspecified site.</p> <p>010. Tuberculosis of meninges and central nervous system.</p> <p>011. Tuberculosis of intestines, peritoneum, and mesenteric glands.</p> <p>012. Tuberculosis of bones and joints, active or unspecified.<br/>(0) Active or unspecified tuberculosis of vertebral column.<br/>(1) Active or unspecified tuberculosis of hip.<br/>(2) Active or unspecified tuberculosis of knee.<br/>(3) Active or unspecified tuberculosis of other and unspecified bones and joints.</p> <p>013. Late effects of tuberculosis of bones and joints.<br/>(0) Late effects of tuberculosis of vertebral column.<br/>(1) Late effects of tuberculosis of hip.<br/>(2) Late effects of tuberculosis of knee.<br/>(3) Late effects of tuberculosis of other and unspecified bones and joints.</p> <p>014. Tuberculosis of skin and subcutaneous cellular tissue.</p> | <p><b>I. INFECTIVE AND PARASITIC DISEASES.—Cont.</b></p> <p>(0) Primary tuberculosis of skin</p> <p>(1) Erythema nodosum specified as tuberculous.</p> <p>(2) Lupus.</p> <p>(3) Other tuberculosis of skin and subcutaneous cellular tissue.</p> <p>015. Tuberculosis of lymphatic system.</p> <p>016. Tuberculosis of genito-urinary system.</p> <p>017. Tuberculosis of adrenal glands.</p> <p>018. Tuberculosis of other organs.<br/>(0) Tuberculosis of eye.<br/>(1) Tuberculosis of ear.<br/>(2) Other.</p> <p>019. Disseminated tuberculosis.<br/>(0) Acute miliary tuberculosis specified as nonpulmonary.<br/>(1) Acute miliary tuberculosis, unspecified.<br/>(2) Other forms of disseminated tuberculosis.</p> <p>020. Congenital syphilis.<br/>(0) Interstitial keratitis.<br/>(1) Juvenile neurosyphilis.<br/>(2) Other congenital syphilis.</p> <p>021. Early syphilis.<br/>(0) Primary syphilis, except extragenital chancre.<br/>(1) Extragenital chancre.<br/>(2) Secondary syphilis.<br/>(3) Early syphilis, relapse following treatment.<br/>(4) Early syphilis, unspecified stage.</p> <p>022. Aneurysm of aorta.</p> <p>023. Other cardiovascular syphilis.</p> <p>024. Tabes dorsalis.</p> <p>025. General paralysis of insane.</p> <p>026. Other syphilis of central nervous system.</p> <p>027. Other forms of late syphilis.</p> <p>028. Latent syphilis.<br/>(0) Early latent.</p> |

DETAILED INTERNATIONAL LIST — *Continued.*

## I. INFECTIVE AND PARASITIC DISEASES.

—*Cont.*

- (.1) Late latent.
- (.2) Unspecified.
- 029. Syphilis, unqualified.
- 030. Acute or unspecified gonorrhea.
- 031. Chronic gonococcal infection of genito-urinary system.
- 032. Gonococcal infection of joint.
- 033. Gonococcal infection of eye.
- 034. Gonococcal infection of other sites.
- 035. Late effects of gonococcal infection.
- 036. Chancroid.
- 037. Lymphogranuloma venereum.
- 038. Granuloma inguinale, venereal.
- 039. Other and unspecified venereal diseases.
- 040. Typhoid fever.
- 041. Paratyphoid fever.
- 042. Other *Salmonella* infections.
  - (.0) Without mention of food as vehicle of infection.
  - (.1) With food as vehicle of infection.
- 043. Cholera.
- 044. Brucellosis (undulant fever).
- 045. Bacillary dysentery.
  - (.0) Flexner-Boyd group.
  - (.1) Schmitz.
  - (.2) Shiga.
  - (.3) Sonne.
  - (.4) Bacillary, other, and unspecified.
- 046. Amebiasis.
  - (.0) Without mention of liver abscess.
  - (.1) With liver abscess.
- 047. Other protozoal dysentery.
- 048. Unspecified forms of dysentery.
- 049. Food poisoning (infection and intoxication).
  - (.0) Staphylococcal.
  - (.1) Botulism.
  - (.2) Unspecified.
- 050. Scarlet fever.
- 051. Streptococcal sore throat.
- 052. Erysipelas.
- 053. Septicemia and pyemia.
  - (.0) Streptococcus.
  - (.1) Staphylococcus.
  - (.2) Pneumococcus.
  - (.3) Other specified organism.
  - (.4) Organism unspecified.
- 054. Bacterial toxemia.
- 055. Diphtheria.
- 056. Whooping cough.
  - (.0) Without mention of pneumonia.
  - (.1) With pneumonia.
- 057. Meningococcal infections.
  - (.0) Meningococcal meningitis.
  - (.1) Acute and unspecified meningococemia.
  - (.2) Chronic meningococemia.
  - (.3) Other forms of meningococcal infection.
- 058. Plague.
  - (.0) Bubonic.
  - (.1) Pneumonic.
  - (.2) Other.
- 059. Tularemia.
- 060. Leprosy.
  - (.0) Lepromatous leprosy.
  - (.1) Neuroleprosy.
  - (.2) Mixed.
  - (.3) Unspecified.
- 061. Tetanus.
- 062. Anthrax.
- 063. Gas gangrene.
- 064. Other bacterial diseases.
  - (.0) Epidemic arthritic erythema.
  - (.1) Rat-bite fever due to *Streptobacillus moniliformis*.
  - (.2) Glanders.
  - (.3) Melioidosis.
  - (.4) Other.
- 070. Vincent's infection.
- 071. Relapsing fever.
  - (.0) Louse-borne.
  - (.1) Tick-borne.
  - (.2) Unspecified.
- 072. Leptospirosis icterohemorrhagica (Weil's disease).
- 073. Yaws.

## I. INFECTIVE AND PARASITIC DISEASES.

—*Cont.*

- 074. Other spirochetal and leptospirochetal infections.
  - (.0) Rat-bite fever due to *Spirocheta morsus muris* (Sodoku).
- (.1) Other.
- 080. Acute poliomyelitis.
  - (.0) Specified as bulbar or polioencephalitis.
  - (.1) With other paralysis.
  - (.2) Specified as nonparalytic.
  - (.3) Unspecified.
- 081. Late effects of acute poliomyelitis.
- 082. Acute infectious encephalitis.
- 083. Late effects of acute infectious encephalitis.
  - (.0) Postencephalitic Parkinsonism.
  - (.1) Postencephalitic personality and character disorders.
  - (.2) Postencephalitic psychosis.
  - (.3) Other postencephalitic conditions.
- 084. Smallpox.
- 085. Measles.
  - (.0) Without mention of pneumonia.
  - (.1) With pneumonia.
- 086. Rubella (German measles).
- 087. Chickenpox.
- 088. Herpes zoster.
- 089. Mumps.
- 090. Dengue.
- 091. Yellow fever.
- 092. Infectious hepatitis.
- 093. Glandular fever (infectious mononucleosis).
- 094. Rabies.
- 095. Trachoma.
- 096. Other diseases attributable to viruses.
  - (.0) Herpes febrilis.
  - (.1) Infectious keratoconjunctivitis.
  - (.2) Psittacosis and ornithosis.
  - (.3) Cowpox.
  - (.4) Epidemic hiccough.
  - (.5) Epidemic myalgia (Bornholm disease).
  - (.6) Foot and mouth disease.
  - (.7) Sandfly fever.
  - (.8) Rift Valley fever.
  - (.9) Other.
- 100. Louse-borne epidemic typhus.
- 101. Flea-borne endemic typhus (murine).
- 102. Brill's disease, not specified as louse- or flea-borne typhus.
- 103. Tabardillo (Mexican typhus), not specified as louse- or flea-borne.
- 104. Tick-borne typhus.
- 105. Mite-borne typhus.
- 106. Wolynian fever (trench fever).
- 107. Typhus, unspecified.
- 108. Other rickettsial diseases.
- 110. Vivax malaria (benign tertian).
- 111. Malariae malaria (quartan).
- 112. Falciparum malaria (malignant tertian).
- 113. Ovale malaria.
- 114. Mixed malarial infections.
- 115. Blackwater fever.
- 116. Other and unspecified forms of malaria.
- 117. Recurrent induced malaria.
- 120. Leishmaniasis.
  - (.0) Visceral (Kala-azar).
  - (.1) Cutaneous (Oriental sore).
  - (.2) Mucocutaneous (American).
  - (.3) Unspecified.
- 121. Trypanosomiasis.
  - (.0) African (sleeping sickness).
  - (.1) South American (Chagas' disease).
  - (.2) Other.
- 122. Other protozoal diseases.
  - (.0) Coccidiosis.
  - (.1) Toxoplasmosis.
  - (.2) Other.
- 123. Schistosomiasis.
  - (.0) Vesical (*S. hematobium*).
  - (.1) Intestinal (*S. mansoni*).
  - (.2) Pulmonary (*S. japonicum*).
  - (.3) Other and unspecified schistosomiasis.
- 124. Other trematode infestation.
  - (.0) Clonorchiasis.
  - (.1) Paragonimiasis.
  - (.2) Other.
- 125. Hydatid disease.
- 126. Other cestode infestation.

DETAILED INTERNATIONAL LIST — *Continued.*I. INFECTIVE AND PARASITIC DISEASES.—*Cont.*

- 127. Filariasis.
- 128. Trichiniasis.
- 129. Ankylostomiasis.
- 130. Infestation with worms of other, mixed, and unspecified type.
  - (.0) Ascariasis.
  - (.1) Oxyuriasis.
  - (.2) Mixed intestinal helminth infestation.
  - (.3) Other.
- 131. Dermatophytosis.
- 132. Actinomycosis.
- 133. Coccidioidomycosis.
- 134. Other fungus infections.
  - (.0) Blastomycosis.
  - (.1) Cryptococcosis (torulosis).
  - (.2) Histoplasmosis.
  - (.3) Moniliasis.
  - (.4) Sporotrichosis.
  - (.5) Other.
- 135. Scabies.
- 136. Pediculosis.
- 137. Other arthropod infestation.
- 138. Other infective and parasitic diseases.
  - (.0) Sarcoid of Boeck.
  - (.1) Other.

## II. NEOPLASMS.

- 140. Malignant neoplasm of lip.
- 141. Malignant neoplasm of tongue.
- 142. Malignant neoplasm of salivary gland.
  - (.0) Mixed salivary gland tumor.
  - (.1) Other.
- 143. Malignant neoplasm of floor of mouth.
- 144. Malignant neoplasm of other parts of mouth and mouth unspecified.
- 145. Malignant neoplasm of oral mesopharynx.
- 146. Malignant neoplasm of nasopharynx.
- 147. Malignant neoplasm of hypopharynx.
- 148. Malignant neoplasm of pharynx, unspecified.
- 150. Malignant neoplasm of esophagus.
- 151. Malignant neoplasm of stomach.
- 152. Malignant neoplasm of small intestine, including duodenum.
- 153. Malignant neoplasm of large intestine, except rectum.
- 154. Malignant neoplasm of rectum.
- 155. Malignant neoplasm of biliary passages and of liver (stated to be primary site).
- 156. Malignant neoplasm of liver (secondary and unspecified).
  - (.1) Not stated whether primary or secondary.
  - (.2) Secondary, primary site not specified.
- 157. Malignant neoplasm of pancreas.
- 158. Malignant neoplasm of peritoneum.
- 159. Malignant neoplasm of unspecified digestive organs.
- 160. Malignant neoplasm of nose, nasal cavities, middle ear, and accessory sinuses.
- 161. Malignant neoplasm of larynx.
- 162. Malignant neoplasm of trachea, and of bronchus and lung specified as primary.
- 163. Malignant neoplasm of lung and bronchus, unspecified as to whether primary or secondary.
- 164. Malignant neoplasm of mediastinum.
- 165. Malignant neoplasm of thoracic organs (secondary).
- 170. Malignant neoplasm of breast.
- 171. Malignant neoplasm of cervix uteri.
- 172. Malignant neoplasm of corpus uteri.
- 173. Malignant neoplasm of other parts of uterus, including chorio-epithelioma.
- 174. Malignant neoplasm of uterus, unspecified.
- 175. Malignant neoplasm of ovary, Fallopian tube, and broad ligament.
- 176. Malignant neoplasm of other and unspecified female genital organs.
- 177. Malignant neoplasm of prostate.
- 178. Malignant neoplasm of testis.
- 179. Malignant neoplasm of other and unspecified male genital organs.
- 180. Malignant neoplasm of kidney.
- 181. Malignant neoplasm of bladder and other urinary organs.
- 190. Malignant melanoma of skin.

II. NEOPLASMS.—*Cont.*

- 191. Other malignant neoplasm of skin.
- 192. Malignant neoplasm of eye.
- 193. Malignant neoplasm of brain and other parts of nervous system.
- 194. Malignant neoplasm of thyroid gland.
- 195. Malignant neoplasm of other endocrine glands.
- 196. Malignant neoplasm of bone (including jaw bone).
- 197. Malignant neoplasm of connective tissue.
- 198. Secondary and unspecified malignant neoplasm of lymph nodes.
  - (.1) Not specified whether primary or secondary.
  - (.2) Secondary.
- 199. Malignant neoplasm of other and unspecified sites.
  - (.1) Malignant neoplasm of other specified sites (primary)
  - (.2) Malignant neoplasm (not secondary), site unspecified.
  - (.3) Malignant neoplasm of small intestine, including duodenum, specified as secondary.
  - (.4) Malignant neoplasm of large intestine, except rectum (secondary).
  - (.5) Malignant neoplasm of brain and other parts of nervous system (secondary).
  - (.6) Secondary malignant neoplasm of bone (including jaw bone).
  - (.7) Malignant neoplasm of any other site except liver, thoracic organs and lymph nodes (secondary).
  - (.8) Generalized and metastatic neoplasm of multiple sites.
- 200. Lymphosarcoma and reticulosarcoma.
  - (.0) Reticulum cell sarcoma.
  - (.1) Lymphosarcoma.
  - (.2) Other primary malignant neoplasms of lymphoid tissue.
- 201. Hodgkin's disease.
- 202. Other forms of lymphoma (reticulosis).
  - (.0) Giant follicular lymphoma (Brill-Symmer's disease).
  - (.1) Other.
- 203. Multiple myeloma (plasmocytoma).
- 204. Leukemia and aleukemia.
  - (.0) Lymphatic leukemia.
  - (.1) Myeloid leukemia.
  - (.2) Monocytic leukemia.
  - (.3) Acute leukemia, unspecified type.
  - (.4) Other and unspecified leukemia.
- 205. Mycosis fungoides.
- 210. Benign neoplasm of buccal cavity and pharynx.
- 211. Benign neoplasm of other parts of digestive system.
- 212. Benign neoplasm of respiratory system.
- 213. Benign neoplasm of breast.
- 214. Uterine fibromyoma.
- 215. Other benign neoplasm of uterus.
- 216. Benign neoplasm of ovary.
- 217. Benign neoplasm of other female genital organs.
- 218. Benign neoplasm of male genital organs.
- 219. Benign neoplasm of kidney and other urinary organs.
- 220. Benign melanoma of skin.
- 221. Pilonidal cyst.
- 222. Other benign neoplasm of skin.
- 223. Benign neoplasm of brain and other parts of nervous system.
- 224. Benign neoplasm of endocrine glands.
- 225. Benign neoplasm of bone and cartilage.
- 226. Lipoma.
- 227. Other benign neoplasm of muscular and connective tissue.
- 228. Hemangioma and lymphangioma.
- 229. Benign neoplasm of other and unspecified organs and tissues.
- 230. Neoplasm of unspecified nature of digestive organs.
- 231. Neoplasm of unspecified nature of respiratory organs.
- 232. Neoplasm of unspecified nature of breast.
- 233. Neoplasm of unspecified nature of uterus.
- 234. Neoplasm of unspecified nature of ovary.
- 235. Neoplasm of unspecified nature of other female genital organs.

DETAILED INTERNATIONAL LIST — *Continued.*II. NEOPLASMS.—*Cont.*

- 236. Neoplasm of unspecified nature of other genito-urinary organs.
- 237. Neoplasm of unspecified nature of brain and other parts of nervous system.
- 238. Neoplasm of unspecified nature of skin and musculoskeletal system.
- 239. Neoplasm of unspecified nature of other and unspecified organs.

## III. ALLERGIC, ENDOCRINE SYSTEM, METABOLIC, AND NUTRITIONAL DISEASES.

- 240. Hay fever.
- 241. Asthma.
- 242. Angioneurotic edema.
- 243. Urticaria.
- 244. Allergic eczema.
- 245. Other allergic disorders.
- 250. Simple goiter.
- 251. Nontoxic nodular goiter.
- 252. Thyrotoxicosis with or without goiter.
  - (0) Toxic diffuse goiter.
  - (1) Toxic nodula goiter.
- 253. Myxedema and cretinism.
- 254. Other diseases of thyroid gland.
- 260. Diabetes mellitus.
- 270. Disorders of pancreatic internal secretion other than diabetes mellitus.
- 271. Diseases of parathyroid gland.
  - (0) Hyperparathyroidism.
  - (1) Hypoparathyroidism.
  - (2) Other and unspecified.
- 272. Diseases of pituitary gland.
- 273. Diseases of thymus gland.
- 274. Diseases of adrenal glands.
- 275. Ovarian dysfunction.
- 276. Testicular dysfunction.
- 277. Polyglandular dysfunction and other diseases of endocrine glands.
- 280. Beriberi.
- 281. Pellagra.
- 282. Scurvy.
- 283. Active rickets.
- 284. Late effects of rickets.
- 285. Osteomalacia.
- 286. Other avitaminoses and nutritional deficiency states.
  - (0) Steatorrhea and sprue.
  - (1) Vitamin A deficiency.
  - (2) Vitamin B deficiency, except beriberi and pellagra.
  - (3) Vitamin C deficiency, except scurvy.
  - (4) Vitamin D deficiency, except rickets and osteomalacia.
  - (5) Malnutrition, unqualified.
  - (6) Other and multiple deficiency states.
- 287. Obesity, not specified as of endocrine origin.
- 288. Gout.
- 289. Other metabolic diseases.
  - (0) Lipidosis (disturbance of lipid metabolism).
  - (1) Amyloidosis.
  - (2) Other.

## IV. DISEASES OF THE BLOOD AND BLOOD-FORMING ORGANS.

- 290. Pernicious and other hyperchromic anemias.
  - (0) Pernicious anemia.
  - (1) Subacute combined degeneration of spinal cord.
  - (2) Other hyperchromic anemias.
- 291. Iron deficiency anemias (hypochromic anemias).
- 292. Other anemias of specified type.
  - (0) Familial acholuric jaundice.
  - (1) Acute hemolytic anemias.
  - (2) Other hemolytic anemias.
  - (3) Leuko-erythroblastic anemia.
  - (4) Aplastic anemia.
  - (5) Nonregenerative anemia.
  - (6) Sickle cell anemia.
  - (7) Other specified anemias.
- 293. Anemia of unspecified type.
- 294. Polycythemia.
- 295. Hemophilia.
- 296. Purpura and other hemorrhagic conditions.

IV. DISEASES OF THE BLOOD AND BLOOD-FORMING ORGANS.—*Cont.*

- 297. Agranulocytosis.
  - 298. Diseases of spleen.
    - (0) Hepatolienal fibrosis.
    - (1) Other.
  - 299. Other diseases of blood and blood-forming organs.
- V. MENTAL, PSYCHONEUROTIC, AND PERSONALITY DISORDERS.
- 300. Schizophrenic disorders (dementia praecox).
    - (0) Simple type.
    - (1) Hebephrenic type.
    - (2) Catatonic type.
    - (3) Paranoid type.
    - (4) Acute schizophrenic reaction.
    - (5) Latent schizophrenia.
    - (6) Schizo-affective psychosis.
    - (7) Other and unspecified.
  - 301. Manic-depressive reaction.
    - (0) Manic and circular.
    - (1) Depressive.
    - (2) Other.
  - 302. Involuntional melancholia.
  - 303. Paranoia and paranoid states.
  - 304. Senile psychosis.
  - 305. Presenile psychosis.
  - 306. Psychosis with cerebral arteriosclerosis.
  - 307. Alcoholic psychosis.
  - 308. Psychosis of other demonstrable etiology.
    - (0) Resulting from brain tumor.
    - (1) Resulting from epilepsy and other convulsive disorders.
    - (2) Other.
  - 309. Other and unspecified psychoses.
  - 310. Anxiety reaction without mention of somatic symptoms.
  - 311. Hysterical reaction without mention of anxiety reaction.
  - 312. Phobic reaction.
  - 313. Obsessive-compulsive reaction.
  - 314. Neurotic-depressive reaction.
  - 315. Psychoneurosis with somatic symptoms (somatization reaction) affecting circulatory system.
    - (0) Neurocirculatory asthenia.
    - (1) Other heart manifestations specified as of psychogenic origin.
    - (2) Other circulatory manifestations of psychogenic origin.
  - 316. Psychoneurosis with somatic symptoms (somatization reaction) affecting digestive system.
    - (0) Mucous colitis specified as of psychogenic origin.
    - (1) Irritability of colon specified as of psychogenic origin.
    - (2) Gastric neuroses.
    - (3) Other digestive manifestations specified as of psychogenic origin.
  - 317. Psychoneurosis with somatic symptoms (somatization reactions) affecting other systems.
    - (0) Psychogenic reactions affecting respiratory system.
    - (1) Psychogenic reactions affecting genito-urinary system.
    - (2) Pruritus of psychogenic origin.
    - (3) Other cutaneous neuroses.
    - (4) Psychogenic reactions affecting musculoskeletal system.
    - (5) Psychogenic reactions affecting other systems.
  - 318. Psychoneurotic disorders, other, mixed, and unspecified types.
    - (0) Hypochondriacal reaction.
    - (1) Depersonalization.
    - (2) Occupational neurosis.
    - (3) Asthenic reaction.
    - (4) Mixed.
    - (5) Of other and unspecified types.
  - 320. Pathological personality.
    - (0) Schizoid personality.
    - (1) Paranoid personality.
    - (2) Cyclothymic personality.
    - (3) Inadequate personality.
    - (4) Antisocial personality.

DETAILED INTERNATIONAL LIST — *Continued.*V. MENTAL, PSYCHONEUROTIC, AND PERSONALITY DISORDERS.—*Cont.*

- (.5) Asocial personality.
- (.6) Sexual deviation.
- (.7) Other and unspecified.
- 321. Immature personality.
  - (.0) Emotional instability.
  - (.1) Passive dependency.
  - (.2) Aggressiveness.
  - (.3) Enuresis characterizing immature personality.
  - (.4) Other symptomatic habits except speech impediments.
  - (.5) Other and unspecified.
- 322. Alcoholism.
  - (.0) Acute.
  - (.1) Chronic.
  - (.2) Unspecified.
- 323. Other drug addiction.
- 324. Primary childhood behavior disorders.
- 325. Mental deficiency.
  - (.0) Idiocy.
  - (.1) Imbecility.
  - (.2) Moron.
  - (.3) Borderline intelligence.
  - (.4) Mongolism.
  - (.5) Other and unspecified types.
- 326. Other and unspecified character, behavior, and intelligence disorders.
  - (.0) Specific learning defects.
  - (.1) Stammering and stuttering of non-organic origin.
  - (.2) Other speech impediments of non-organic origin.
  - (.3) Acute situational maladjustment.
  - (.4) Other and unspecified.

## VI. DISEASES OF THE NERVOUS SYSTEM AND SENSE ORGANS.

- 330. Subarachnoid hemorrhage.
- 331. Cerebral hemorrhage.
- 332. Cerebral embolism and thrombosis.
- 333. Spasm of cerebral arteries.
- 334. Other and ill-defined vascular lesions affecting central nervous system.
- 340. Meningitis, except meningococcal and tuberculous.
  - (.0) Hemophilus influenzae.
  - (.1) Pneumococcus.
  - (.2) Due to other specified organism.
  - (.3) Unspecified cause.
- 341. Phlebitis and thrombophlebitis of intracranial venous sinuses.
- 342. Intracranial and intraspinal abscess.
- 343. Encephalitis, myelitis, and encephalomyelitis (except acute infectious).
- 344. Late effects of intracranial abscess or pyogenic infection.
- 345. Multiple sclerosis.
- 350. Paralysis agitans.
- 351. Cerebral spastic infantile paralysis.
- 352. Other cerebral paralysis.
- 353. Epilepsy.
  - (.0) Petit mal.
  - (.1) Grand mal.
  - (.2) Status epilepticus.
  - (.3) Other and unspecified.
- 354. Migraine.
- 355. Other diseases of brain.
- 356. Motor neurone disease and muscular atrophy.
  - (.0) Progressive muscular atrophy.
  - (.1) Amyotrophic lateral sclerosis.
  - (.2) Spinal type of muscular atrophy.
  - (.3) Other and unspecified manifestations.
- 357. Other diseases of spinal cord.
- 360. Facial paralysis.
- 361. Trigeminal neuralgia.
- 362. Brachial neuritis.
- 363. Sciatica.
- 364. Polyneuritis and polyradiculitis.
- 365. Erythroedema polyneuropica.
- 366. Other and unspecified forms of neuralgia and neuritis.
- 367. Other diseases of cranial nerves.
- 368. Other diseases of peripheral nerves except autonomic.
- 369. Diseases of peripheral autonomic nervous system.
- 370. Conjunctivitis and ophthalmia.
- 371. Blepharitis.

VI. DISEASES OF THE NERVOUS SYSTEM AND SENSE ORGANS.—*Cont.*

- 372. Hordeolum (sty).
- 373. Iritis.
- 374. Keratitis.
- 375. Choroiditis.
- 376. Other inflammation of uveal tract.
- 377. Inflammation of optic nerve and retina.
- 378. Inflammation of lachrymal glands and ducts.
- 379. Other inflammatory diseases of eye.
- 380. Refractive errors.
- 381. Corneal ulcer.
- 382. Corneal opacity.
- 383. Pterygium.
- 384. Strabismus.
- 385. Cataract.
- 386. Detachment of retina.
- 387. Glaucoma.
- 388. Other diseases of eye.
- 389. Blindness.
  - (.0) Both eyes, specifically defined.
  - (.1) Both eyes, not specifically defined.
  - (.2) One eye, specifically defined.
  - (.3) One eye, not specifically defined.
- 390. Otitis externa.
- 391. Otitis media without mention of mastoiditis.
  - (.0) Acute.
  - (.1) Chronic.
  - (.2) Unspecified.
- 392. Otitis media with mastoiditis.
  - (.0) Acute.
  - (.1) Chronic.
  - (.2) Unspecified.
- 393. Mastoiditis without mention of otitis media.
  - (.0) Acute.
  - (.1) Chronic.
  - (.2) Unspecified.
- 394. Other inflammatory diseases of ear.
- 395. Mènière's disease.
- 396. Other diseases of ear and mastoid process.
- 397. Deaf mutism.
- 398. Other deafness.
  - (.0) Deafness, both ears.
  - (.1) Deafness, one ear, and partial deafness in other.
  - (.2) Deafness, one ear.
  - (.3) Impairment of hearing, one or both ears.

## VII. DISEASES OF THE CIRCULATORY SYSTEM.

- 400. Rheumatic fever without mention of heart involvement.
- 401. Rheumatic fever with heart involvement.
  - (.0) Active rheumatic pericarditis.
  - (.1) Active rheumatic endocarditis.
  - (.2) Active rheumatic myocarditis.
  - (.3) Active rheumatic fever with other and multiple types of heart involvement.
- 402. Chorea.
  - (.0) Without mention of heart involvement.
  - (.1) With heart involvement.
- 410. Diseases of mitral valve.
- 411. Diseases of aortic valve specified as rheumatic.
- 412. Diseases of tricuspid valve.
- 413. Diseases of pulmonary valve specified as rheumatic.
- 414. Other endocarditis specified as rheumatic.
- 415. Other myocarditis specified as rheumatic.
- 416. Other heart disease specified as rheumatic.
- 420. Arteriosclerotic heart disease, including coronary disease.
  - (.0) Arteriosclerotic heart disease so described.
  - (.1) Heart disease specified as involving coronary arteries.
  - (.2) Angina pectoris without mention of coronary disease.
- 421. Chronic endocarditis not specified as rheumatic.
  - (.0) Of mitral valve, specified as non-rheumatic.
  - (.1) Of aortic valve, not specified as rheumatic.
  - (.2) Of tricuspid valve, specified as non-rheumatic.
  - (.3) Of pulmonary valve, not specified as rheumatic.
  - (.4) Other and ill-defined, not specified as rheumatic.

DETAILED INTERNATIONAL LIST — *Continued.*VII. DISEASES OF THE CIRCULATORY SYSTEM.  
—*Cont.*

422. Other myocardial degeneration.
  - (.0) Fatty degeneration.
  - (.1) With arteriosclerosis.
  - (.2) Other.
430. Acute and subacute endocarditis.
  - (.0) Acute and subacute bacterial endocarditis.
  - (.1) Other acute endocarditis.
431. Acute myocarditis, not specified as rheumatic.
432. Acute pericarditis, specified as nonrheumatic.
433. Functional disease of heart.
  - (.0) Heart block.
  - (.1) Other disorders of heart rhythm.
  - (.2) Other functional diseases of heart.
434. Other and unspecified diseases of heart.
  - (.0) Kyphoscoliotic heart disease.
  - (.1) Congestive heart failure.
  - (.2) Left ventricular failure.
  - (.3) Other and unspecified diseases of heart.
440. Essential benign hypertension with heart disease.
441. Essential malignant hypertension with heart disease.
442. Hypertensive heart disease with arteriolar nephrosclerosis.
443. Other and unspecified hypertensive heart disease.
444. Essential benign hypertension without mention of heart.
445. Essential malignant hypertension without mention of heart.
446. Hypertension with arteriolar nephrosclerosis without mention of heart.
447. Other hypertensive disease without mention of heart.
450. General arteriosclerosis.
  - (.0) Without mention of gangrene.
  - (.1) With gangrene.
451. Aortic aneurysm specified as nonsyphilitic, and dissecting aneurysm.
452. Other aneurysm, except of heart and aorta.
453. Peripheral vascular disease.
  - (.0) Raynaud's disease.
  - (.1) Thrombo-angiitis obliterans.
  - (.2) Chilblains.
  - (.3) Other.
454. Arterial embolism and thrombosis.
455. Gangrene of unspecified cause.
456. Other diseases of arteries.
460. Varicose veins of lower extremities.
461. Hemorrhoids.
462. Varicose veins of other specified sites.
  - (.0) Varicocele.
  - (.1) Varicose veins of esophagus.
  - (.2) Other.
463. Phlebitis and thrombophlebitis of lower extremities.
464. Phlebitis and thrombophlebitis of other sites.
465. Pulmonary embolism and infarction.
466. Other venous embolism and thrombosis.
467. Other diseases of circulatory system.
  - (.0) Hypotension.
  - (.1) Diseases of capillaries.
  - (.2) Other and unspecified circulatory diseases.
468. Certain diseases of lymph nodes and lymph channels.
  - (.0) Chronic lymphadenitis.
  - (.1) Nonspecific mesenteric lymphadenitis.
  - (.2) Lymphadenitis, unqualified.
  - (.3) Noninfective diseases of lymphatic channels.

## VIII. DISEASES OF THE RESPIRATORY SYSTEM.

470. Acute nasopharyngitis (common cold).
471. Acute sinusitis.
472. Acute pharyngitis.
  - (.0) Sore throat, unqualified.
  - (.1) Other.
473. Acute tonsillitis.
474. Acute laryngitis and tracheitis.
475. Acute upper respiratory infection of multiple or unspecified sites.
480. Influenza with pneumonia.

VIII. DISEASES OF THE RESPIRATORY SYSTEM.  
—*Cont.*

481. Influenza with other respiratory manifestations, and influenza, unqualified.
482. Influenza with digestive manifestations, but without respiratory symptoms.
483. Influenza with nervous manifestations, but without digestive or respiratory symptoms.
490. Lobar pneumonia.
491. Bronchopneumonia.
492. Primary atypical pneumonia.
493. Pneumonia, other and unspecified.
500. Acute bronchitis.
501. Bronchitis, unqualified.
502. Chronic bronchitis.
  - (.0) Bronchitis with emphysema.
  - (.1) Other.
510. Hypertrophy of tonsils and adenoids.
  - (.0) Without mention of tonsillectomy or adenoidectomy.
  - (.1) With tonsillectomy or adenoidectomy.
511. Peritonsillar abscess (quinsy).
512. Chronic pharyngitis and nasopharyngitis.
  - (.0) Chronic pharyngitis.
  - (.1) Chronic nasopharyngitis.
513. Chronic sinusitis.
514. Defected nasal septum.
515. Nasal polyp.
516. Chronic laryngitis.
517. Other diseases of upper respiratory tract.
518. Empyema.
519. Pleurisy.
  - (.0) Without mention of effusion or tuberculosis.
  - (.1) With effusion with mention of a bacterial cause other than tuberculosis.
  - (.2) Other specified forms of effusion, except tuberculous.
520. Spontaneous pneumothorax.
521. Abscess of lung.
522. Pulmonary congestion and hypostasis.
523. Pneumoconiosis due to silica and silicates (occupational).
  - (.0) Silicosis.
  - (.1) Anthracosilicosis.
  - (.2) Asbestosis.
  - (.3) Other, including pneumoconiosis unspecified.
524. Other specified pneumoconiosis and pulmonary fibrosis of occupational origin.
525. Other chronic interstitial pneumonia.
526. Bronchiectasis.
527. Other diseases of lung and pleural cavity.
  - (.0) Pulmonary collapse (1 year and over).
  - (.1) Emphysema without mention of bronchitis.
  - (.2) Other.

## IX. DISEASES OF THE DIGESTIVE SYSTEM.

530. Dental caries.
  - (.0) Dental caries, unqualified.
  - (.1) With pulp exposure.
  - (.2) With periapical abscess.
  - (.3) Other.
531. Abscesses of supporting structures of teeth.
  - (.0) Pericoronal.
  - (.1) Peridental (parietal).
  - (.2) Other and unspecified.
532. Other inflammatory diseases of supporting structures of teeth.
  - (.0) Gingivitis, except ulcerative.
  - (.1) Periodontitis (pyorrhea, inflammatory)
  - (.2) Periodontosis (pyorrhea, degenerative).
  - (.3) Other.
533. Disorders of occlusion, eruption, and tooth development.
  - (.0) Malocclusion.
  - (.1) Disorders of first dentition.
  - (.2) Impacted teeth.
  - (.3) Unerupted teeth.
  - (.4) Partially erupted teeth.
  - (.5) Congenital anomalies of teeth.
  - (.6) Chronic dental fluorosis.
  - (.7) Other.
534. Toothache from unspecified cause.

DETAILED INTERNATIONAL LIST — *Continued.*IX. DISEASES OF THE DIGESTIVE SYSTEM.—*Cont.*

535. Other diseases of teeth and supporting structures.
536. Stomatitis.
537. Diseases of salivary glands.
538. Other diseases of buccal cavity.
539. Diseases of esophagus.
  - (0) Functional disorders of esophagus.
  - (1) Other.
540. Ulcer of stomach.
  - (0) Without mention of perforation.
  - (1) With perforation.
541. Ulcer of duodenum.
  - (0) Without mention of perforation.
  - (1) With perforation.
542. Gastrojejunal ulcer.
  - (0) Without mention of perforation.
  - (1) With perforation.
543. Gastritis and duodenitis.
544. Disorders of function of stomach.
  - (0) Disorders of gastric secretion.
  - (1) Disorders of gastric motility.
  - (2) Other.
545. Other diseases of stomach and duodenum.
550. Acute appendicitis.
  - (0) Without mention of peritonitis.
  - (1) With peritonitis.
551. Appendicitis, unqualified.
552. Other appendicitis.
553. Other diseases of appendix.
560. Hernia of abdominal cavity without mention of obstruction.
  - (0) Inguinal.
  - (1) Femoral.
  - (2) Umbilical.
  - (3) Ventral (incisional).
  - (4) Other specified site.
  - (5) Unspecified site.
561. Hernia of abdominal cavity with obstruction.
  - (0) Inguinal.
  - (1) Femoral.
  - (2) Umbilical.
  - (3) Ventral (incisional).
  - (4) Other specified site.
  - (5) Unspecified site.
570. Intestinal obstruction without mention of hernia.
  - (0) Intussusception.
  - (1) Paralytic ileus.
  - (2) Mesenteric infarction.
  - (3) Volvulus.
  - (4) Impaction of intestine.
  - (5) Other.
571. Gastro-enteritis and colitis, except ulcerative, age 4 weeks and over.
  - (0) Ages between 4 weeks and 2 years.
  - (1) Ages 2 years and over.
572. Chronic enteritis and ulcerative colitis.
  - (0) Regional enteritis.
  - (1) Diverticulitis.
  - (2) Ulcerative colitis.
  - (3) Other.
573. Functional disorders of intestines.
  - (0) Constipation.
  - (1) Mucous colitis.
  - (2) Irritability of colon.
  - (3) Other.
574. Anal fissure and fistula.
575. Abscess of anal and rectal regions.
576. Peritonitis.
577. Peritoneal adhesion.
578. Other diseases of intestines and peritoneum.
580. Acute and subacute yellow atrophy of liver.
581. Cirrhosis of liver.
  - (0) Without mention of alcoholism.
  - (1) With alcoholism.
582. Suppurative hepatitis and liver abscess.
583. Other diseases of liver.
584. Cholelithiasis.
585. Cholecystitis without mention of calculi.
586. Other diseases of gallbladder and biliary ducts.
587. Diseases of pancreas.
  - (0) Acute pancreatitis.
  - (1) Chronic pancreatitis.
  - (2) Other diseases of pancreas.

## X. DISEASES OF THE GENITO-URINARY SYSTEM.

590. Acute nephritis.
591. Nephritis with edema, including nephrosis.
592. Chronic nephritis.
593. Nephritis not specified as acute or chronic.
594. Other renal sclerosis.
600. Infections of kidney.
  - (0) Pyelitis, pyelocystitis, and pyelonephritis.
  - (1) Abscess of kidney and perirenal tissue.
  - (2) Other.
601. Hydronephrosis.
602. Calculi of kidney and ureter.
603. Other diseases of kidney and ureter.
604. Calculi of other parts of urinary system.
605. Cystitis.
606. Other diseases of bladder.
607. Urethritis (nonvenereal).
608. Stricture of urethra.
609. Other diseases of urethra.
610. Hyperplasia of prostate.
611. Prostatitis.
612. Other diseases of prostate.
613. Hydrocele.
614. Orchitis and epididymitis.
615. Redundant prepuce and phimosis.
616. Sterility, male.
617. Other diseases of male genital organs.
620. Chronic cystic disease of breast.
621. Other diseases of breast.
  - (0) Acute mastitis not associated with lactation.
  - (1) Hypertrophy of breast.
  - (2) Other.
622. Acute salpingitis and oophoritis.
623. Chronic salpingitis and oophoritis.
624. Salpingitis and oophoritis, unqualified.
625. Other diseases of ovary and Fallopian tube.
626. Diseases of parametrium and pelvic peritoneum (female).
630. Infective disease of uterus, vagina, and vulva.
  - (0) Cervicitis.
  - (1) Other infective diseases of uterus.
  - (2) Vaginitis and vulvitis.
631. Uterovaginal collapse.
632. Malposition of uterus.
633. Other diseases of uterus.
634. Disorders of menstruation.
635. Menopausal symptoms.
636. Sterility, female.
637. Other diseases of female genital organs.
  - (0) Leukorrhea.
  - (1) Other.

## XI. DELIVERIES AND COMPLICATIONS OF PREGNANCY, CHILDBIRTH, AND THE PUERPERIUM.

640. Pyelitis and pyelonephritis of pregnancy.
641. Other infections of genito-urinary tract during pregnancy.
642. Toxemias of pregnancy.
  - (0) Hypertensive disease arising during pregnancy.
  - (1) Renal disease arising during pregnancy.
  - (2) Pre-eclampsia of pregnancy.
  - (3) Eclampsia of pregnancy.
  - (4) Hyperemesis gravidarum.
  - (5) Other.
643. Placenta praevia.
644. Other hemorrhage of pregnancy.
645. Ectopic pregnancy.
  - (0) Without mention of sepsis.
  - (1) With sepsis.
646. Anemia of pregnancy.
647. Pregnancy with malposition of foetus in uterus.
648. Other complications arising from pregnancy.
  - (0) Threatened abortion.
  - (1) Hydatidiform mole.
  - (2) Placental abnormalities not classified elsewhere.
  - (3) Other.
649. Pregnancy associated with other conditions.
650. Abortion without mention of sepsis or toxemia.
  - (0) Spontaneous or unspecified.
  - (1) Induced for medical or legal indications.
  - (2) Induced for other reasons.
  - (3) Other.

DETAILED INTERNATIONAL LIST — *Continued.*XI. DELIVERIES AND COMPLICATIONS OF PREGNANCY, CHILDBIRTH, AND THE PUERPERIUM.  
—*Cont.*

651. Abortion with sepsis.  
 (0) Spontaneous or unspecified.  
 (1) Induced for medical or legal indications.  
 (2) Induced for other reasons.  
 (3) Other.
652. Abortion with toxemia, without mention of sepsis.  
 (0) Spontaneous or unspecified.  
 (1) Induced for medical or legal indications.  
 (2) Induced for other reasons.  
 (3) Other.
- The following subgroupings have been used as a fourth digit for all conditions included in 660-678:  
 (0) Spontaneous.  
 (1) Manipulation without instruments.  
 (2) Forceps (only) low and unspecified.  
 (3) Forceps (only) mid and high.  
 (4) Other surgical or instrumental, except Cesarean section.  
 (5) Cesarean section.  
 (6) Unspecified type of delivery.  
 (7) Delivered before admission.
660. Delivery without complication.
670. Delivery complicated by placenta praevia or antepartum hemorrhage.
671. Delivery complicated by retained placenta.
672. Delivery complicated by other postpartum hemorrhage.
673. Delivery complicated by abnormality of bony pelvis.
674. Delivery complicated by disproportion or malposition of foetus.
675. Delivery complicated by prolonged labor of other origin.
676. Delivery with laceration of perineum, without mention of other laceration.
677. Delivery with other trauma.
678. Delivery with other complications of childbirth.
680. Puerperal urinary infection without other sepsis.
681. Sepsis of childbirth and the puerperium.
682. Puerperal phlebitis and thrombosis.
683. Pyrexia of unknown origin during the puerperium.
684. Puerperal pulmonary embolism.
685. Puerperal eclampsia.
686. Other forms of puerperal toxemia.
687. Cerebral hemorrhage in the puerperium.
688. Other and unspecified complications of the puerperium.  
 (0) Anemia of puerperium.  
 (1) Puerperal psychosis.  
 (2) Sudden death from unknown cause in the puerperium.  
 (3) Other.
689. Mastitis and other disorders of lactation.

## XII. DISEASES OF THE SKIN AND CELLULAR TISSUE.

690. Boil and carbuncle.  
 (0) Of face.  
 (1) Of neck.  
 (2) Of trunk.  
 (3) Of upper arm and forearm.  
 (4) Of hand.  
 (5) Of buttock.  
 (6) Of other parts of lower extremity.  
 (7) Of other and multiple sites.  
 (8) Of unspecified site.
691. Cellulitis of finger and toe.
692. Other cellulitis and abscess without mention of lymphangitis.  
 (0) Of head and neck.  
 (1) Of trunk.  
 (2) Of upper arm and forearm.  
 (3) Of hand, except fingers.  
 (4) Of leg.  
 (5) Of foot, except toes.  
 (6) Of other, multiple, and unspecified sites.

XII. DISEASES OF THE SKIN AND CELLULAR TISSUE.  
—*Cont.*

693. Other cellulitis and abscess with lymphangitis.  
 (0) Of head and neck.  
 (1) Of trunk.  
 (2) Of upper arm and forearm.  
 (3) Of hand, except fingers.  
 (4) Of leg.  
 (5) Of foot, except toes.  
 (6) Of other, multiple, and unspecified sites.
694. Acute lymphadenitis.
695. Impetigo.
696. Infectious warts.
697. Molluscum contagiosum.
698. Other local infections of skin and subcutaneous tissue.
700. Seborrhoeic dermatitis.
701. Eczema.
702. Occupational dermatitis.  
 (0) Due to plants.  
 (1) Due to oils and greases.  
 (2) Due to solvents.  
 (3) Due to drugs.  
 (4) Due to other chemicals.  
 (5) Due to radiation.  
 (6) Other.
703. Other dermatitis.  
 (0) Due to plants.  
 (1) Due to oils and greases.  
 (2) Due to solvents.  
 (3) Due to drugs.  
 (4) Due to other chemicals.  
 (5) Due to radiation.  
 (6) Due to other specified agents.  
 (7) Unqualified.
704. Pemphigus.  
 (0) Dermatitis herpetiformis.  
 (1) Other.
705. Erythematous conditions.  
 (0) Toxic erythema.  
 (1) Erythema multiforme (erythema iris).  
 (2) Erythema nodosum.  
 (3) Rosacea.  
 (4) Lupus erythematosus.  
 (5) Other and unqualified.
706. Psoriasis and similar disorders.  
 (0) Psoriasis.  
 (1) Parapsoriasis.  
 (2) Pityriasis rosea.  
 (3) Other and unspecified pityriasis.  
 (4) Other.
707. Lichen planus.
708. Pruritus and related conditions.  
 (0) Pruritus ani.  
 (1) Pruritus of genital organs.  
 (2) Prurigo.  
 (3) Lichenification and lichen simplex chronicus.  
 (4) Dermatitis factitia (artefacta).  
 (5) Other pruritic conditions.
709. Corns and callosities.
710. Other hypertrophic and atrophic conditions of skin.  
 (0) Scleroderma and dermatomyositis.  
 (1) Keratoderma.  
 (2) Hereditary edema of legs (Milroy's disease).  
 (3) Striae atrophicæ.  
 (4) Keloid scar.  
 (5) Other hypertrophic and atrophic conditions of skin.
711. Other dermatoses.
712. Diseases of nail.
713. Diseases of hair and hair follicles.
714. Diseases of sweat and sebaceous glands.  
 (0) Diseases of sweat glands.  
 (1) Acne.  
 (2) Other diseases of sebaceous glands.
715. Chronic ulcer of skin.
716. Other diseases of skin.

## XIII. DISEASES OF THE BONES AND ORGANS OF MOVEMENT.

720. Acute arthritis due to pyogenic organisms.
721. Acute nonpyogenic arthritis.

DETAILED INTERNATIONAL LIST — *Continued.*XIII. DISEASES OF THE BONES AND ORGANS OF MOVEMENT.—*Cont.*

722. Rheumatoid arthritis and allied conditions.  
 (.0) Rheumatoid arthritis.  
 (.2) Spondylitis ankylopoietica.  
 (.2) Chronic rheumatoid nodular fibrositis.
723. Osteo-arthritis (arthrosis) and allied conditions.  
 (.0) Osteo-arthritis (arthrosis).  
 (.1) Spondylitis osteo-arthritica (spondylarthrosis).  
 (.2) Adult osteochondrosis of spine.
724. Other specified forms of arthritis.
725. Arthritis, unspecified.
726. Muscular rheumatism.  
 (.0) Lumbago.  
 (.1) Myofibrosis of humeroscapular region.  
 (.2) Torticollis not specified as congenital, psychogenic, or traumatic.  
 (.3) Other muscular rheumatism, fibrositis, and myalgia.
727. Rheumatism, unspecified.
730. Osteomyelitis and periostitis.  
 (.0) Acute osteomyelitis.  
 (.1) Chronic osteomyelitis.  
 (.2) Unspecified osteomyelitis.  
 (.3) Periostitis without mention of osteomyelitis.
731. Osteitis deformans.
732. Osteochondrosis.
733. Other diseases of bone.
734. Internal derangement of knee joint.
735. Displacement of intervertebral disc.
736. Affection of sacro-iliac joint.
737. Ankylosis of joint.  
 (.0) Of spine.  
 (.1) Of shoulder.  
 (.2) Of elbow.  
 (.3) Of wrist.  
 (.4) Of finger.  
 (.5) Of hip.  
 (.6) Of knee.  
 (.7) Of ankle.  
 (.8) Of other and multiple sites.  
 (.9) Of unspecified site.
738. Other diseases of joint.
740. Bunion.
741. Synovitis, bursitis, and tenosynovitis without mention of occupational origin.
742. Synovitis, bursitis, and tenosynovitis of occupational origin.
743. Infective myositis and other inflammatory diseases of tendon and fascia.
744. Other diseases of muscle, tendon, and fascia.  
 (.0) Myasthenia gravis.  
 (.1) Inborn defect of muscle.  
 (.2) Other.
745. Curvature of spine.
746. Flat foot.
747. Hallux valgus and varus.
748. Clubfoot.
749. Other deformities.

## XIV. CONGENITAL MALFORMATIONS.

750. Monstrosity.
751. Spina bifida and meningocele.
752. Congenital hydrocephalus.
753. Other congenital malformations of nervous system and sense organs.  
 (.0) Congenital cataract.  
 (.1) Other.
754. Congenital malformations of circulatory system.  
 (.0) Tetralogy of Fallot.  
 (.1) Patent ductus arteriosus (Botalli).  
 (.2) Interventricular septal defect.  
 (.3) Interauricular septal defect.  
 (.4) Other and unspecified malformations of heart.  
 (.5) Coarctation of aorta.  
 (.6) Other circulatory malformations.

XIV. CONGENITAL MALFORMATIONS.—*Cont.*

755. Cleft palate and harelip.
756. Congenital malformations of digestive system.  
 (.0) Congenital hypertrophic pyloric stenosis.  
 (.1) Imperforate anus.  
 (.2) Other.
757. Congenital malformations of genito-urinary system.  
 (.0) Undescended testicle.  
 (.1) Polycystic disease of kidney  
 (.2) Congenital malformations of external genital organs.  
 (.3) Other.
758. Congenital malformations of bone and joint.  
 (.0) Congenital dislocation of hip.  
 (.1) Chondrodystrophy.  
 (.2) Congenital malformations of skull.  
 (.3) Brittle bones.  
 (.4) Cervical rib.  
 (.5) Congenital abnormalities of lumbosacral region.  
 (.6) Other congenital malformations of bone and joint.
759. Other and unspecified congenital malformations, not elsewhere classified.  
 (.0) Of respiratory system.  
 (.1) Of skin.  
 (.2) Of muscle.  
 (.3) Other and unspecified.

## XV. CERTAIN DISEASES OF EARLY INFANCY.

760. Intracranial and spinal injury at birth.  
 (.0) Without mention of immaturity.  
 (.5) With immaturity.
761. Other birth injury.  
 (.0) Without mention of immaturity.  
 (.5) With immaturity.
762. Postnatal asphyxia and atelectasis.  
 (.0) Without mention of immaturity.  
 (.5) With immaturity.
763. Pneumonia of newborn.  
 (.0) Without mention of immaturity.  
 (.5) With immaturity.
764. Diarrhea of newborn.  
 (.0) Without mention of immaturity.  
 (.5) With immaturity.
765. Ophthalmia neonatorum.  
 (.0) Without mention of immaturity.  
 (.5) With immaturity.
766. Pemphigus neonatorum.  
 (.0) Without mention of immaturity.  
 (.5) With immaturity.
767. Umbilical sepsis.  
 (.0) Without mention of immaturity.  
 (.5) With immaturity.
768. Other sepsis of newborn.  
 (.0) Without mention of immaturity.  
 (.5) With immaturity.
769. Neonatal disorders arising from maternal toxemia.  
 (.0) Attributed to "toxemia of pregnancy," without mention of immaturity.  
 (.1) Attributed to maternal diabetes, without mention of immaturity.  
 (.2) Attributed to maternal rubella, without mention of immaturity.  
 (.3) Attributed to toxoplasmosis, without mention of immaturity.  
 (.4) Attributed to other or unspecified maternal toxemia, without mention of immaturity.  
 (.5) Attributed to "toxemia of pregnancy" with immaturity.  
 (.6) Attributed to maternal diabetes, with immaturity.  
 (.7) Attributed to maternal rubella, with immaturity.  
 (.8) Attributed to toxoplasmosis, with immaturity.  
 (.9) Attributed to other or unspecified maternal toxemia, with immaturity.

DETAILED INTERNATIONAL LIST — *Continued.*

## XV. CERTAIN DISEASES OF EARLY INFANCY.

—*Cont.*

770. Hemolytic disease of newborn (erythroblastosis).  
 (0) Erythroblastosis without mention of nervous affection or immaturity.  
 (1) Kernicterus, without mention of immaturity.  
 (2) Erythroblastosis with disorder of liver other than icterus gravis, without mention of immaturity.  
 (5) Erythroblastosis, without mention of nervous affection but with immaturity.  
 (6) Kernicterus with immaturity.  
 (7) Erythroblastosis with disorder of liver other than icterus gravis, with immaturity.
771. Hemorrhagic disease of newborn.  
 (0) Without mention of immaturity.  
 (5) With immaturity.
772. Nutritional maladjustment.  
 (0) Without mention of immaturity.  
 (5) With immaturity.
773. Ill-defined diseases peculiar to early infancy.  
 (0) Without mention of immaturity.  
 (5) With immaturity.
774. Immaturity with mention of any other subsidiary condition.
775. Immaturity subsidiary to some other cause.
776. Immaturity, unqualified.

## XVI. SYMPTOMS, SENILITY, AND ILL-DEFINED CONDITIONS.

780. Certain symptoms referable to nervous system and special senses.  
 (0) Coma and stupor.  
 (1) Delirium.  
 (2) Convulsions.  
 (3) Jacksonian epilepsy.  
 (4) Abnormal involuntary movement.  
 (5) Disturbance of coördination.  
 (6) Vertigo.  
 (7) Disturbance of sleep.  
 (8) Disturbance of memory.  
 (9) Meningismus.
781. Other symptoms referable to nervous system and special senses.  
 (0) Disturbance of vision except defective sight.  
 (1) Oculomotor disturbance.  
 (2) Photophobia.  
 (3) Disturbance of hearing except deafness.  
 (4) Disturbance of cranial nerves except optic, oculomotor, and auditory.  
 (5) Stammering and stuttering.  
 (6) Other disturbance of speech, including alexia and agraphia.  
 (7) Other disturbance of sensation.  
 (8) Encephalopathy.  
 (9) Hallucinations.
782. Symptoms referable to cardiovascular and lymphatic system.  
 (0) Precordial pain.  
 (1) Palpitation.  
 (2) Tachycardia.  
 (3) Pallor and cyanosis (not of newborn).  
 (4) Acute heart failure, undefined.  
 (5) Syncope or collapse.  
 (6) Edema and dropsy (not of newborn).  
 (7) Enlargement of lymph node.  
 (8) Splenomegaly.  
 (9) Shock without mention of trauma.
783. Symptoms referable to respiratory system.  
 (0) Epistaxis.  
 (1) Hemoptysis.  
 (2) Dyspnea.  
 (3) Cough.  
 (4) Excess of sputum.  
 (5) Change in voice.  
 (6) Stridor.  
 (7) Pain in chest.
784. Symptoms referable to upper gastro-intestinal tract.  
 (0) Anorexia.

XVI. SYMPTOMS, SENILITY, AND ILL-DEFINED CONDITIONS.—*Cont.*

- (1) Nausea and vomiting.  
 (2) Pylorospasm.  
 (3) Heartburn.  
 (4) Dysphagia.  
 (5) Hematemesis.  
 (6) Excessive salivation.  
 (7) Hiccough.  
 (8) Eructation.
785. Symptoms referable to abdomen and lower gastro-intestinal system.  
 (0) Abdominal swelling (not referable to any particular organ).  
 (1) Hepatomegaly.  
 (2) Jaundice.  
 (3) Ascites.  
 (4) Flatulence.  
 (5) Abdominal pain.  
 (6) Diarrhea, age 2 years and over.  
 (7) Incontinence of feces.  
 (8) Melena (age 1 year and over).  
 (9) Visible peristalsis.
786. Symptoms referable to genito-urinary system.  
 (0) Pain referable to urinary system.  
 (1) Retention of urine.  
 (2) Incontinence of urine.  
 (3) Frequency of micturition.  
 (4) Polyuria.  
 (5) Oliguria, anuria (not of newborn).  
 (6) Priapism.  
 (7) Pain referable to genital organs, including dyspareunia.
787. Symptoms referable to limbs and back.  
 (0) Transient paralysis of limb, cause unknown.  
 (1) Pain in limb.  
 (2) Swelling of limb.  
 (3) Pain in joint.  
 (4) Swelling of joint.  
 (5) Pain in back.  
 (6) Difficulty in walking.  
 (7) Abnormality of gait.
788. Other general symptoms.  
 (0) Dehydration.  
 (1) Excessive sweating.  
 (2) Rash.  
 (3) Subcutaneous nodules.  
 (4) Loss of weight.  
 (5) Tetany.  
 (6) Acidosis.  
 (7) Alkalosis.  
 (8) Pyrexia of unknown origin.  
 (9) Other specified symptoms not classifiable elsewhere.
789. Abnormal urinary constituents of unspecified cause.  
 (0) Albuminuria, unqualified.  
 (1) Albuminuria, orthostatic.  
 (2) Pyuria and bacteriuria.  
 (3) Chyluria.  
 (4) Hematuria.  
 (5) Hemoglobinuria.  
 (6) Glycosuria.  
 (7) Acetonuria.
790. Nervousness and debility.  
 (0) Nervousness.  
 (1) Debility and undue fatigue.  
 (2) Depression.
791. Headache.
792. Uremia, unqualified.
793. Observation, without need for further medical care.  
 (0) Mental.  
 (1) Other specified.  
 (2) Unspecified.
794. Senility without mention of psychosis.
795. Ill-defined and unknown causes of morbidity and mortality.  
 (0) Other ill-defined conditions.  
 (1) Malingering.  
 (2) Sudden death (cause unknown).  
 (3) Found dead (cause unknown).  
 (4) Died without sign of disease.  
 (5) Other, unknown and unspecified causes.

DETAILED INTERNATIONAL LIST — *Continued.*

## XVII. ACCIDENTS, POISONINGS, AND VIOLENCE.

Accidents, poisonings and violence are classified according to external cause. Therefore, it should be understood that the letter E—External Cause, precedes all of the following categories. The latter, except 960-965, include only current injuries from accidents and other violence. Late effects of injury from accident, poisoning, and other violence are brought together under 960-965. Late effects refer to the usually inactive residual effects of indefinite duration after the acute illness from the injury has terminated.

- 800. Railway accident involving railroad employee.
- 801. Railway accident involving passenger.
- 802. Railway accident involving other and unspecified person.

The following subgrouping, indicated by addition of a fourth digit, has been used for 810-835.

- (.0) Accident involving goods-transport vehicle(s), but no other motor vehicle.
- (.1) Accident involving goods-transport vehicle and passenger motor vehicle.
- (.2) Accident involving goods-transport vehicle and motor bus.
- (.3) Accident involving goods-transport vehicle and unspecified motor vehicle.
- (.4) Accident involving passenger motor vehicle(s), but no other motor vehicle.
- (.5) Accident involving passenger motor vehicle and motor bus.
- (.6) Accident involving passenger motor vehicle and unspecified motor vehicle.
- (.7) Accident involving motor bus(es), but no other motor vehicle.
- (.8) Accident involving motor bus and unspecified motor vehicle.
- (.9) Accident involving unspecified motor vehicles.
- 810. Motor-vehicle traffic accident involving collision with railway train.
- 811. Motor-vehicle traffic accident involving collision with streetcar.
- 812. Motor-vehicle traffic accident to pedestrian.
- 813. Motor-vehicle traffic accident to rider of bicycle.
- 814. Motor-vehicle traffic accident to rider or passenger of motorcycle, in collision with nonmotor vehicle or object.
- 815. Motor-vehicle traffic accident to rider or passenger of motorcycle in collision with other motor vehicle.
- 816. Other motor-vehicle traffic accident involving two or more motor vehicles.
- 817. Motor-vehicle traffic accident to occupant of motor vehicle in collision with pedestrian or bicycle.
- 818. Motor-vehicle traffic accident involving collision with animal or animal-drawn vehicle.
- 819. Motor-vehicle traffic accident involving collision with fixed or unspecified object.
- 820. Motor-vehicle traffic accident while boarding and alighting.
- 821. Motor-vehicle traffic accident to rider of motorcycle not involving collision.
- 822. Motor-vehicle traffic accident involving overturning on highway.
- 823. Motor-vehicle traffic accident involving running off highway.
- 824. Other noncollision motor-vehicle traffic accident.
- 825. Motor-vehicle traffic accident of unspecified nature.
- 830. Motor-vehicle nontraffic accident to pedestrian.
- 831. Motor-vehicle nontraffic accident to rider of bicycle.
- 832. Motor-vehicle nontraffic accident to rider or passenger of motorcycle.

XVII. ACCIDENTS, POISONINGS, AND VIOLENCE.  
—*Cont.*

- 833. Other motor-vehicle nontraffic accident involving two or more motor vehicles.
  - 834. Motor-vehicle nontraffic accident while boarding and alighting.
  - 835. Motor-vehicle nontraffic accident of other and unspecified nature.
  - 840. Streetcar accident to pedestrian.
  - 841. Other streetcar accident, except collision with motor vehicle.
  - 842. Accident to pedestrian caused by bicycle.
  - 843. Accident to rider of bicycle not involving collision with motor vehicle.
  - 844. Accident to pedestrian caused by other nonmotor road vehicle.
  - 845. Other nonmotor road-vehicle accidents.
  - 850. Drowning of occupant of small boat.
  - 851. Other water-transport injury by drowning.
  - 852. Falls on stairs and ladders in water transport.
  - 853. Other falls from one level to another in water transport.
  - 854. Falls on same level in water transport.
  - 855. Unspecified falls in water transport.
  - 856. Machinery accident in water transport.
  - 857. Other specified accidents in water transport.
  - 858. Water-transport accident of unspecified cause.
  - 860. Accident to personnel in military aircraft.
  - 861. Injury to occupant by accident to commercial "transport" aircraft.
  - 862. Other injury in commercial "transport" aircraft.
  - 863. Injury to occupant by accident to other aircraft.
  - 864. Aircraft accident at airfield to person not in aircraft.
  - 865. Aircraft accident elsewhere to person not in aircraft.
  - 866. Other and unspecified aircraft accidents.
- The following subgrouping indicated by the addition of a fourth digit has been used for nontransport accidents (870-936) to denote the place where the accident or poisoning occurred.
- (.0) Home (including home premises and any noninstitutional place of residence).
  - (.1) Farm (including buildings and land under cultivation, but excluding farm home and home premises).
  - (.2) Mine and quarry.
  - (.3) Industrial place and premises.
  - (.4) Place for recreation and sport.
  - (.5) Street and highway.
  - (.6) Public building.
  - (.7) Resident institution.
  - (.8) Other specified places.
  - (.9) Place not specified.
  - 870. Accidental poisoning by morphine and other opium derivatives.
  - 871. Accidental poisoning by barbituric acid and derivatives.
  - 872. Accidental poisoning by aspirin and salicylates.
  - 873. Accidental poisoning by bromides.
  - 874. Accidental poisoning by other analgesic and soporific drugs.
  - 875. Accidental poisoning by sulphonamides.
  - 876. Accidental poisoning by strychnine.
  - 877. Accidental poisoning by belladonna, hyoscine, and atropine.
  - 878. Accidental poisoning by other and unspecified drugs.
  - 879. Accidental poisoning by noxious foodstuffs.
  - 880. Accidental poisoning by alcohol.
  - 881. Accidental poisoning by petroleum products.
  - 882. Accidental poisoning by industrial solvents.
  - 883. Accidental poisoning by corrosive aromatics, acids, and caustic alkalis.
  - 884. Accidental poisoning by mercury and its compounds.
  - 885. Accidental poisoning by lead and its compounds.
  - 886. Accidental poisoning by arsenic and antimony, and their compounds.
  - 887. Accidental poisoning by fluorides.
  - 888. Accidental poisoning by other and unspecified solid and liquid substances.

DETAILED INTERNATIONAL LIST — *Continued.*

XVII. ACCIDENTS, POISONINGS, AND VIOLENCE.

—*Cont.*

890. Accidental poisoning by utility (illuminating) gas.
891. Accidental poisoning by motor-vehicle exhaust gas.
892. Accidental poisoning by other carbon-monoxide gas.
893. Accidental poisoning by cyanide gas.
894. Accidental poisoning by other specified gases and vapors.
895. Accidental poisoning by unspecified gases and vapors.
900. Fall on stairs.
901. Fall from ladders.
902. Other falls from one level to another.
903. Fall on same level.
904. Unspecified falls.
910. Blow from falling object.
911. Accident caused by vehicle.
912. Accident caused by machinery.
913. Accident caused by cutting and piercing instruments.
914. Accident caused by electric current.
915. Accident caused by explosion of pressure vessel.
916. Accident caused by fire and explosion of combustible material.
917. Accident caused by hot substance, corrosive liquid, and steam.
918. Accident caused by radiation.
919. Accident caused by firearms.
920. Foreign body entering eye and adnexa.
921. Inhalation and ingestion of food causing obstruction or suffocation.
922. Inhalation and ingestion of other object causing obstruction or suffocation.
923. Foreign body entering other orifice.
924. Accidental mechanical suffocation in bed and crib.
925. Accidental mechanical suffocation in other and unspecified circumstances.
926. Lack of care of infants under 1 year of age.
927. Accidents caused by bites and stings of venomous animals and insects.
928. Other accidents caused by animals.
929. Accidental drowning and submersion.
930. High and low air pressure.
931. Excessive heat and insolation.
932. Excessive cold.
933. Hunger, thirst, and exposure.
934. Cataclysm.
935. Lightning.
936. Other and unspecified accidents.
940. Generalized vaccinia following vaccination.
941. Postvaccinal encephalitis.
942. Other complications of smallpox vaccination.
943. Post-immunization jaundice and hepatitis.
944. Other complications of prophylactic inoculation.
945. Complications of anesthesia for nontherapeutic purposes.
946. Other complications due to nontherapeutic medical and surgical procedures.
950. Therapeutic misadventure in surgical treatment.
951. Therapeutic misadventure in infusion or transfusion.
952. Therapeutic misadventure in local applications.
953. Therapeutic misadventure in administration of drugs or biologicals.
954. Therapeutic misadventure in anesthesia.
955. Other and unspecified therapeutic misadventure.
956. Late complication of surgical operation.
957. Late complication of amputation stump.

XVII. ACCIDENTS, POISONINGS, AND VIOLENCE.

—*Cont.*

958. Late complication of irradiation.
959. Late complications of other forms of treatment.
960. Late effect of motor-vehicle accident.
961. Late effect of accidental poisoning.
962. Late effect of other accidental injury.
963. Late effect of self-inflicted injury.
964. Late effect of injury purposely inflicted by another person (not in war).
965. Late effects of injuries due to war operations.
970. Suicide and self-inflicted poisoning by analgesic and soporific substances.
  - (1) Morphine and other opium derivatives.
  - (2) Barbituric acid and derivatives.
  - (3) Acetylsalicylic acid.
  - (4) Methyl salicylate.
  - (5) Other salicylates.
  - (6) Bromides.
  - (7) Antipyretic substances, not elsewhere classified.
  - (8) Others.
  - (9) Unspecified drugs.
971. Suicide and self-inflicted poisoning by other solid and liquid substances.
  - (1) Strychnine.
  - (2) Phenol compounds.
  - (3) Lye and potash.
  - (4) Cresol compounds.
  - (5) Mercury and its compounds.
  - (6) Arsenic and its compounds.
  - (7) Fluorides.
  - (8) Others.
972. Suicide and self-inflicted poisoning by gases in domestic use.
973. Suicide and self-inflicted poisoning by other gases.
  - (1) Motor-vehicle exhaust gas.
  - (2) Other motor exhaust gas.
  - (3) Other carbon monoxide gas.
  - (4) Other gases.
974. Suicide and self-inflicted injury by hanging and strangulation.
975. Suicide and self-inflicted injury by drowning and submersion.
976. Suicide and self-inflicted injury by firearms and explosives.
977. Suicide and self-inflicted injury by cutting and piercing instruments.
978. Suicide and self-inflicted injury by jumping from high place.
979. Suicide and self-inflicted injury by other and unspecified means.
980. Nonaccidental poisoning by another person.
981. Assault by firearms and explosives.
982. Assault by cutting and piercing instruments.
983. Assault by other means.
984. Injury by intervention of police.
985. Execution.
990. Injury due to war operations by gas and chemicals.
991. Injury due to war operations by gunshot.
992. Injury due to war operations by grenade and land mine.
993. Injury due to war operations by bomb.
994. Injury due to war operations by marine mine depth charge, and torpedo.
995. Injury due to war operations by explosion of artillery shell.
996. Injury due to war operations by explosion of undetermined origin.
997. Injury due to war operations by aircraft destruction.
998. Injury due to war operations by other and unspecified means.
999. Injury due to war operations but occurring after cessation of hostilities.

## 2. ABBREVIATED LIST.

The following table shows each title of the Abbreviated List. The numbers of the titles of the Detailed International List included in each title of the abbreviated list appear in parentheses.

Abbreviated  
List Number

CAUSE OF DEATH.

1. Tuberculosis of respiratory system (001-008).
2. Tuberculosis, other forms (010-019).
3. Syphilis and its sequelae (020-029).
4. Typhoid fever (040).
5. Cholera (043).
6. Dysentery, all forms (045-048).
7. Scarlet fever and streptococcal sore throat (050, 051).
8. Diphtheria (055).
9. Whooping cough (056).
10. Meningococcal infections (057).
11. Plague (058).
12. Acute poliomyelitis (080).
13. Smallpox (084).
14. Measles (085).
15. Typhus and other rickettsial diseases (100-108).
16. Malaria (110-117).
17. All other diseases classified as infective and parasitic (030-039, 041, 042, 044, 049, 052-054, 059-074, 081-083, 086-096, 120-138).
18. Malignant neoplasms, including neoplasms of lymphatic and hematopoietic tissues (140-205).
19. Benign and unspecified neoplasms (210-239).
20. Diabetes mellitus (260).
21. Anemias (290-293).
22. Vascular lesions affecting central nervous system (330-334).
23. Nonmeningococcal meningitis (340).
24. Rheumatic fever (400-402).
25. Chronic rheumatic heart disease (410-416).
26. Arteriosclerotic and degenerative heart disease (420-422).
27. Other diseases of heart (430-434).
28. Hypertension with heart disease (440-443).
29. Hypertension without mention of heart (444-447).
30. Influenza (480-483).
31. Pneumonia (490-493).
32. Bronchitis (500-502).
33. Ulcer of stomach and duodenum (540, 541).
34. Appendicitis (550-553).
35. Intestinal obstruction and hernia (560, 561, 570).
36. Gastritis, duodenitis, enteritis and colitis, except diarrhea of the newborn (543, 571, 572).
37. Cirrhosis of liver (581).
38. Nephritis and nephrosis (590-594).
39. Hyperplasia of prostate (610).
40. Complications of pregnancy, childbirth and the puerperium (640-652, 670-689).
41. Congenital malformations (750-759).
42. Birth injuries, postnatal asphyxia and atelectasis (760-762).
43. Infections of the newborn (763-768).
44. Other diseases peculiar to early infancy, and immaturity unqualified (769-776).
45. Senility without mention of psychosis, ill-defined and unknown causes (780-795).
46. All other diseases (240-254, 270-289, 294-326, 341-398, 450-475, 510-539, 542, 544, 545, 573-580, 582-587, 600-609, 611-637, 660, 690-749).
47. Motor-vehicle accidents (810-835).
48. All other accidents (800-802, 840-965).
49. Suicide and self-inflicted injury (970-979).
50. Homicide and operations of war (980-999).
